New Studies in the Age of Goethe, sponsored by the Goethe Society of North America, aims to publish innovative research that contextualizes the “Age of Goethe,” whether within the fields of literature, history (including art history and history of science), philosophy, art, music, or politics. Though the series editors welcome all approaches and perspectives, they are especially interested in interdisciplinary projects, creative approaches to archival or original source materials, theoretically informed scholarship, work that introduces previously undiscovered materials, and projects that re-examine traditional epochal boundaries or open new channels of interpretations.
