Foreword by Albert O. Hirschman	vii
Introduction	1
1. The Setting	7
The Shortage of Power	
The Companies	
2. The Rate Problem: Obstruction and Accommodation	43
The Basic Rate	
The Additionals	
Foreign Exchange	
3. The Latitudes of Distribution	81
Overloadability of Equipment	
Brevity of Construction Period	
Substitutability of Operation and Construction	
Substitution of Consumer for Company Capital	
4. Geographical Separation: State and Foreign Enterprise	107
The Climate of Distrust	
The Propensity to Pre-empt	
Distance and De-escalation	
CHEVAP, A Case of Proximity	
5. Geographical Separation: The State Companies	141
Manyness and Rivalry	
A Digression on Interconnection	
The Trouble with Distance	
6. Functional Separation	175
The Skill Intensity of Generation	
The Political Intensity of Distribution	
Limited Commitment and Unlimited Appeal	
Hydro Generation and Conflict Alleviation	

7. Generation: The Pampered Sector	209
The Tendency to Excess	
Distribution and Transmission: Derived Investment	
Excess Generation and the Rate Situation	
Bibliography	249
Index	259

Tables

1.1 Importance of the Light system in Brazil: area, population, power production, and consumption	8
1.2 São Paulo Light: annual changes in power sales, industrial production, and installed capacity, 1948–1965	12
1.3 Rio and São Paulo systems: annual growth rates, 1947–1962	16
1.4 South-central region: expansions in generating capacity, recommended and under construction (December 1963)	26
2.1 Brazilian Traction, Light and Power Co.: net revenue and capital expenditures, 1947–1965	47
2.2 São Paulo Light: indices of average return per kwh and the cost of living, 1958–1964	52
2.3 São Paulo Light: change in percentage share of additions and basic rate in total receipts, 1956–1964	53
2.4 Preferential foreign exchange rates for equipment imports and foreign debt service in essential industries, as compared to nonpreferential rates (under Brazilian exchange auction system, 1953–1961)	54
3.1 Rio and São Paulo Light: consumer-contributed financing as of December 31, 1964	100
7.1 International Bank for Reconstruction and Development: loans to Brazil, 1952–1963	227

Figures

1.1 São Paulo Light: substandard voltage and frequency due to lack of generating capacity, 1945–1953	11
1.2 Power supply available to metropolitan Rio–São Paulo: additions to installed capacity, 1945–1970	28
1.3 Concession zones, power plants, and state boundaries: São Paulo Light, Rio Light, CHEVAP, CHERP, USELPA, CELUSA, CEMIG, and CPFL (AMFORP)	32
4.1 The Paraíba Valley: Caraguatatuba site, Santa Branca Reservoir, Light concession zones	113
4.2 The Jupiá Plant (CELUSA): transmission to São Paulo Light	116
4.3 The Minas Gerais–São Paulo border: Poços de Caldas and the Furnas–São Paulo transmission lines—concession zones of CEMIG, CHERP, and CPFL (AMFORP)—hydro plants at Furnas, Peixoto, Estreito, and Jaguará	119
4.4 Rio Light zone: location of CHEVAP's Funil and Santa Cruz Plants	123
4.5 Guandu water-pumping station and transmission lines of CHEVAP and Rio Light	133
7.1 São Paulo Light tie-lines with Furnas and substations of Anhanguera, Guarulhos, and Terminal Norte	215
7.2 Transmission lines to Furnas: Peixoto–Furnas–Belo Horizonte, Furnas–Rio de Janeiro, and Furnas–São Paulo	228

Abbreviations

AID	United States Agency for International Development, Rio Mission
AMFORP	American & Foreign Power Company
BNDE	Banco Nacional de Desenvolvimento Econômico
CANAMBRA	Canada-America-Brazil: consortium of Montreal Engineering, Gibbs & Hill, G. E. Crippen Associates
CEEE	Conselho Estadual de Energia Elétrica (São Paulo)
CELUSA	Centrais Elétricas de Urubupungá, S.A.
CEMIG	Centrais Elétricas de Minas Gerais, S.A.
CESP	Centrais Elétricas de São Paulo, S.A.
CHERP	Companhia Hidrelétrica do Rio Pardo, S.A.
CHESF	Companhia Hidrelétrica do São Francisco, S.A.
CHEVAP	Companhia Hidrelétrica do Vale do Paraíba, S.A.
CNAEE	Conselho Nacional de Águas e Energia Elétrica
DAEE	Departamento de Águas e Energia Elétrica (São Paulo)
ELETROBRÁS	Centrais Elétricas Brasileiras, S.A.
FFE	Fundo Federal de Eletrificação
Furnas	Central Elétrica de Furnas, S.A.
Light	São Paulo Light and Rio Light, wholly-owned subsidiaries of the Toronto parent company, Brazilian Traction, Light and Power
USELPA	Usinas Elétricas do Paranapanema, S.A.

*Electric Power in Brazil:
Entrepreneurship in the Public Sector*
