

Contents

1. <i>The Economics of Urban Land: Introduction and Review</i>	1
A. Introduction, 1; B. Theory of land values: before 1900, 2; C. Theory of urban land values: after 1900, 5; D. Approach and basic definitions, 15	
2. <i>Equilibrium of the Household</i>	18
A. Introduction, 18; B. Diagrammatic solution of individual equilibrium, 19; C. Mathematical solution of individual equilibrium, 30.	
3. <i>Agricultural Rent Functions and Bid Price Curves of the Urban Firm</i>	36
A. Introduction, 36; B. A simple model of agricultural rent and land use, 37; C. Equilibrium of the firm, 42; D. Derivation of the bid price curves of the urban firm, 52; E. Equilibrium of the urban firm through bid price curves, 56.	
4. <i>Residential Bid Price Curves</i>	59
A. Introduction, 59; B. Diagrammatic derivation of bid price, 59; C. Mathematical derivation of bid price curves, 68; D. Individual equilibrium through bid price curves, 71; E. Bid price curves of the individual resident and the urban firm and bid rent curves of agriculture: similarities and differences, 73.	
5. <i>Market Equilibrium</i>	76
A. Introduction, 76; B. Simple game solutions, 77; C. Spatial sequence of users of land and marginal and equilibrium price-location pairs, 82; D. Generalized game equilibrium solution for bid price curves with a constant ranking by steepness, 88; E. Game equilibrium solution when bid price curves do not maintain a constant ranking in their steepness, 90; F. Clearance of the market: solution considering quantities, 94; G. The shape of the lot, 99.	

6. <i>Some Applications of the Model and an Outline for Empirical Research</i>	101
A. Introduction, 101; B. The minimum costs of friction hypothesis, 101; C. Income, population growth, and technical change, 105; D. Zoning, 117; E. Empirical testing of the theory and operational models, 125; F. City shapes, 130	

APPENDIXES

A <i>A Simultaneous Equations Solution</i>	145
1. Introduction, 145; 2. Location and area occupied: individual equilibrium, 145; 3. Equilibrium of the market, 150.	
B <i>The Shape of the Individual Lot</i>	158
1. Introduction, 158; 2. The shape of the lot, 158; 3. Location, 164; 4. Note on location by polar co-ordinates, 167.	
C <i>A Regression of Expenditure for Land on Income and Distance</i>	168
1. Expenditure on land (pq), 169; 2. Quantity of land (q), 169; 3. Price (p), 170; 4. Income (y), 171; 5. Distance (t), 171.	
D <i>Classical Consumer Equilibrium</i>	173
1. Diagrammatic solution, 173; 2. Mathematical solution, 178.	
E <i>Lowdon Wingo, Jr.: Transportation and Urban Land</i>	182
F <i>Notes to Chapter 2</i>	185
G <i>Notes to Chapter 3</i>	188
H <i>Notes to Chapter 4</i>	190
I <i>Notes to Chapter 5</i>	192
