

FIGURES

2.1	Relevant solution sequences $\{p_n\}$ of the equation: $p_{n+1} = Ap_n + B$, where $A = (1 - \pi_l a - \pi_r b)$ and $B = \pi_l a$	61
6.1	Dynamics of norms, compliance, and attitudes	196
6.2	Voluntary compliance with a normative change from 0 to 1.0	199
6.3	Voluntary compliance with a normative change from 0 to -1.0	199
6.4	Resistance to a new norm	200
6.5	Compliance with the norm when adjustment increases over time but enforcement is relaxed	201
6.6	Compliance with the norm when both enforcement and adjustment increase over time	201
6.7	Compliance with the norm when enforcement is strong but adjustment is slow	202
6.8	Compliance with the norm when enforcement is strong and adjustment is rapid	202
