

MORAL HAZARD IN HEALTH INSURANCE

KENNETH J. ARROW LECTURE SERIES

KENNETH J. ARROW LECTURE SERIES

Kenneth J. Arrow's work has shaped the course of economics for the past sixty years so deeply that, in a sense, every modern economist is his student. His ideas, style of research, and breadth of vision have been a model for generations of the boldest, most creative, and most innovative economists. His work has yielded such seminal theorems as general equilibrium, social choice, and endogenous growth, proving that simple ideas have profound effects. The Kenneth J. Arrow Lecture Series, supported by the Committee on Global Thought and the Program for Economic Research, highlights economists, from Nobel laureates to groundbreaking younger scholars, whose work builds on Arrow's scholarship as well as his innovative spirit. The books in the series are an expansion of the lectures that are held in Arrow's honor at Columbia University.

*Creating a Learning Society: A New Approach to Growth,
Development, and Social Progress*, Joseph E. Stiglitz and
Bruce C. Greenwald

The Arrow Impossibility Theorem, Eric Maskin and
Amartya Sen

Speculation, Trading, and Bubbles, José A. Scheinkman
