Spine photo: *Setophaga flavescens*, by Bruce Hallett. Cover design and book design and composition by Julie Allred, BW&A Books

The Bahamas National Trust (BNT) was created by an act of Parliament in 1959 to build and manage the national parks system of The Bahamas. The BNT is a science-based organization dedicated to effectively managing national parks to conserve and protect Bahamian natural resources. This comprehensive network of effectively managed national parks and protected areas is important for biodiversity conservation, environmental education, and green spaces for public recreation. Today, 32 national parks are designated to protect more than 2 million acres of The Bahamas. The Trust is the only known nongovernmental organization in the world with the mandate to manage a country's entire national park system.
