Contributors

PASCAL BYÉ is a senior research fellow with the French National Institute for Agronomic Research (INRA), Department of Economics, in Montpellier. Specializing in the analysis of agriculture-industry relations, he has stressed the impact of innovations and new technologies on agro-food system and structure. His present program emphasizes the historical diversity of social, economic, and technological regimes.

MARIA FONTE is Associate Professor of Rural Sociology at the University of Naples, Italy. Her teaching and research topics include the structure of agriculture and the technological evolution in the agro-food system, with special emphasis on the social and economic consequences of modern application of biotechnology to agriculture.

WILLIAM H. FRIEDLAND is Professor Emeritus, having been Professor of Community Studies and Sociology for twenty-two years at the University of California, Santa Cruz. His research has concentrated on the social and technical organization of agriculture, and recently he has worked on the global fresh fruit and vegetable industry.

HARRIET FRIEDMANN is Professor of Sociology at the University of Toronto. Most recently, her research has taken her in two directions: cultural and material aspects of diets in relation to sustainable food economies, and the place of food within the Cold War and post-Cold War shifts in international power and property relations.

CHUL-KYOO KIM is a postdoctoral research fellow at the Center for Area Studies, Seoul National University. He is currently conducting research on East Asian development in the context of global restructuring.

GEOFFREY LAWRENCE is the Foundation Professor of Sociology at the University of Central Queensland in Rockhampton, Queensland, Australia. He is currently undertaking a major study into the social impacts of agricultural biotechnological development.

LUIS LLAMBI is Professor of Anthropology at the Venezuelan Institute for Scientific Research (IVIC), Caracas. His research focuses on comparative agrarian structures in Latin America and the global political economy of agro-food systems.

PHILIP MCMICHAEL is Associate Professor of Rural and Development Sociology and Director of the International Political Economy Program at Cornell University. His research interests include historical sociology of the world economy, global regulation, and current agro-food system restructuring in the Pacific Rim.

TERRY K. MARSDEN is Professor of Geography and Earth Resources at the University of Hull, Great Britain. He has conducted extensive research on rural systems and agricultural change in Britain.

DAVID MYHRE is a visiting research fellow at the Center for U.S.-Mexican Studies at the University of California, San Diego. He is Coordinator of the Center's Ejido Reform Research Project, a three-year study of the consequences for rural Mexico of recent reforms to agrarian laws and agricultural policies. His research interests center on rural social movements, the politics of agricultural finance and investment, and the restructuring of state-peasant relations.

LAURA T. RAYNOLDS is Visiting Assistant Professor of Sociology at the State University of New York, Binghamton. Her research focuses on current processes of restructuring in Latin America and the Caribbean, linking global transformations, shifting state policies, patterns of firm reorganization, and the changing livelihoods of local populations.

KATHLEEN STANLEY teaches sociology at Western Oregon State College. She has worked on the problem of working households in the world economy, and current research focuses on migrant labor in the Willamette Valley of Oregon.

DAVID VAIL is Adams Catlin Professor of Economics at Bowdoin College. He is currently an associate at the Swedish University of Agricultural Sciences Information Center for Rural Planning and a board member of Stockholm University's Swedish Program. His research has centered on the greening of agricultural policy in advanced industrial societies.

FRANK VANCLAY lectures in sociology at Charles Sturt University and is a key researcher with the Centre for Rural Social Research at Charles Sturt University in Wagga Wagga, New South Wales, Australia. He has undertaken numerous consultancies for government departments relating to social and environmental issues in agriculture.

SARAH WHATMORE is Reader in Human Geography at the University of Bristol. She has conducted extensive research on the political economy of agriculture and rural land-use change, particularly its gender and environmental dimensions. She currently holds a Research Fellowship under the Global Environment Change program of the Economic and Social Research Council in Britain.

The Global Restructuring of Agro-Food Systems
