

Contents

Preface — VII

Acknowledgements — X

1 Introduction to Measuring Techniques — 1

- 1.1 Introduction — 1
- 1.2 The Spatial and Temporal Characteristics of the Phenomena to be Measured — 1
 - 1.2.1 Sea Surface Measurements — 2
 - 1.2.2 Water Table Measurements — 3
 - 1.2.3 Wind and Temperature Examples — 3
 - 1.2.4 Summary — 3
- 1.3 A Generic Instrument — 4
- 1.4 Precision and Accuracy — 5
- 1.5 Types of Errors — 6
- 1.6 Noise — 7
- 1.6.1 Preventing Electromagnetic Noise — 8
- 1.7 Why Sensors With Electrical Outputs Are Preferred? — 9

2 Introduction to Transducers and Sensors — 11

- 2.1 Definitions of Transducer, Sensor, Actuator and Detector — 11
- 2.2 Transfer Functions — 13
 - 2.2.1 Range and Dynamic Range — 15
 - 2.2.2 Hysteresis — 16
 - 2.2.3 Calibration — 16
 - 2.2.4 Linearity — 17
 - 2.2.5 Offset and Gain Errors — 18
 - 2.2.6 Drift — 20
 - 2.2.7 An Example of Sensor Specifications — 20
- 2.3 Spatial Characteristics of Sensors — 22
 - 2.3.1 The Decibel — 22
 - 2.3.2 Sensor Directivity — 23
 - 2.3.3 Spatial Averaging — 26
- 2.4 Time and Frequency Characteristics of Sensors and Systems — 27
 - 2.4.1 Introduction — 27
 - 2.4.2 Frequency Content of Signals — 28
 - 2.4.3 Frequency Response — 29
 - 2.4.4 Bandwidth — 31
 - 2.4.5 Time Constant — 34
 - 2.4.6 Rise Time and Fall Time — 36

2.4.7	Time Constant and Bandwidth Relation — 36
2.4.8	Rise Time and Bandwidth Relation — 38
2.4.9	Measuring the Rise Time of a Phenomenon by Means of an Instrument — 38
2.4.10	Summary — 38
2.4.11	Examples to Help Fix Previous Concepts — 39
2.5	Filters — 43
2.5.1	Noise Reduction by Filtering — 44
2.5.2	Filter Delay — 46
2.5.3	Spatial Filtering — 46
2.6	Summary — 47
	References — 48
3	Review of Concepts — 49
3.1	Introduction — 49
3.2	Waves — 49
3.2.1	Introduction — 49
3.2.2	What is a Wave? — 50
3.2.3	Wave Properties — 50
3.3	Harmonic Sound Waves — 51
3.3.1	The Doppler Effect — 53
3.4	Electromagnetic Waves — 56
3.5	Useful Concepts on Wave Propagation — 57
3.5.1	The Bragg Law — 57
3.5.2	Array Signal Processing — 59
3.5.3	Beamforming — 60
3.6	Signal Conversion — 63
3.6.1	Signals — 63
3.6.2	Analog and Digital Signals — 63
3.6.3	Analog Signals — 64
3.6.4	Sampling an Analog Signal — 64
3.6.5	Spatial Aliasing — 67
3.6.6	Analog to Digital Conversion — 68
3.6.7	Application Example — 70
3.6.8	Data Logger — 70
3.7	Electricity — 72
3.7.1	Electrical Energy — 73
3.7.2	DC — 73
3.7.3	AC — 73
3.7.4	DC Ohm's Law and the Resistance Concept — 74
3.7.5	Resistor — 74
3.7.6	Resistors in Series and Parallel — 75

3.7.7	Electric Power —	76
3.7.8	Capacitance and Capacitors —	76
3.7.9	Inductance and Inductors —	77
3.7.10	AC Ohm's Law —	78
3.7.11	Impedance —	78
3.7.12	Faraday's Law —	79
3.7.13	Generation of Electrical Energy —	80
3.7.14	Flux Change Due to a Changing Area —	81
3.7.15	Magnetic Force —	82
3.7.16	Transformers —	83
3.7.17	Toroidal Transformer —	85
3.7.18	Hall-Effect Sensor —	86
3.7.19	Reed Switch and Reed Relay —	87
3.7.20	Summary of Some Electrical Units —	88
3.8	Piezoelectricity —	88
3.8.1	Piezoelectric substances —	88
3.9	Magnetostrictive Effect —	90
3.10	The Coriolis Force —	92
3.10.1	Introduction —	92
3.10.2	The Coriolis Force —	93
3.10.3	Examples of the Coriolis Force —	94
	References —	96
4	Sensors —	98
4.1	Introduction —	98
4.2	Introduction to Electric and Electronic Circuits —	99
4.2.1	Wheatstone Bridge —	100
4.2.2	Four Wire Technique —	101
4.2.3	Operational Amplifier —	103
4.3	Resistive Sensors —	108
4.3.1	Sensors Based on Potentiometers —	108
4.4	Impedance Sensors —	110
4.4.1	Capacitive Sensors —	110
4.4.2	Inductive Sensors —	111
4.4.3	Inductive Actuators —	113
4.4.4	Transformer Sensors —	114
4.5	Oscillators —	115
4.5.1	Introduction to Oscillators —	115
4.5.2	Piezoelectric Oscillators —	117
4.5.3	Piezoelectric Oscillator Applications —	118
4.6	Strain Gauges (or Force Sensors) —	118
4.7	Sensors and Instruments to Measure Temperature —	120

4.7.1	Introduction	— 120
4.7.2	Resistance Temperature Detectors (RTD)	— 121
4.7.3	Thermistors	— 122
4.7.4	Thermocouples	— 124
4.7.4.1	Thermoelectric Effect	— 124
4.7.4.2	Thermocouple Description	— 125
4.7.5	I.C. Sensor	— 126
4.7.6	Infrared Thermometers (IRT)	— 127
4.7.7	Infrared Thermography	— 130
4.7.8	Comparison of Temperature Sensors and Instruments	— 131
4.8	Pressure Sensors	— 132
4.8.1	Introduction	— 132
4.8.2	Types of Sensors	— 133
4.8.2.1	Differential Sensors	— 133
4.8.2.2	Vented Gauge Sensor	— 133
4.8.2.3	Sealed Gauge Sensors	— 134
4.8.2.4	Absolute Pressure Sensor	— 134
4.8.3	Other Pressure Sensor Technologies	— 134
4.8.3.1	Solid State Pressure Sensors	— 134
4.8.3.2	Quartz Crystal Pressure Sensors	— 135
4.8.4	Application of Pressure Sensors to Measure Water Level	— 136
4.9	Humidity Sensors	— 138
4.10	Conductivity Sensors for Fluids	— 140
4.10.1	Conductivity Cell	— 141
4.10.2	Inductive Probe	— 143
4.11	Accelerometers	— 144
4.11.1	MEMS Accelerometers	— 147
4.11.2	Piezoelectric Accelerometers	— 148
4.11.3	Accelerometer Applications	— 149
4.12	Geophones	— 150
4.13	Acoustic Transducers	— 152
4.13.1	Introduction	— 152
4.13.2	Inductive Transducers	— 152
4.13.2.1	Working as Sensor	— 153
4.13.2.2	Working as Generator	— 153
4.13.3	Piezoelectric Transducers	— 154
4.13.4	Piezoelectric Sound Generators	— 155
4.13.5	Hydrophones	— 158
4.13.6	Magnetostrictive Transducers	— 158
4.14	Rotation Sensors	— 159
4.14.1	Rotation Speed	— 160
4.14.2	Rotation Angle	— 163
4.15	Concluding Remarks	— 165
	References	— 167

5	Flow Measurements — 169
5.1	Introduction — 169
5.2	Vortex Flowmeter — 170
5.2.1	Vortex Flowmeter Characteristics — 172
5.3	Electromagnetic Flowmeters — 172
5.3.1	Principle of Operation — 172
5.3.2	Current Meters for Environmental Applications — 173
5.3.3	Industrial Electromagnetic Flowmeter — 174
5.3.4	Common Characteristics of EMCM and EMFM — 177
5.4	Acoustic Flowmeters — 178
5.4.1	Transit Time or Time of Flight Method — 179
5.4.1.1	Direct Measure of Time — 179
5.4.1.2	Frequency Difference Measure — 180
5.4.1.3	Other Acoustic Flowmeters Characteristics — 180
5.4.2	Doppler Flowmeters — 182
5.4.2.1	Installation and Characteristics — 183
5.4.3	New Flowmeters (Both Transit Time and Doppler) — 184
5.4.4	Acoustic Doppler Current Profiler (ADCP) — 185
5.4.4.1	Two-Dimensional Profiler — 185
5.4.4.2	Three-Dimensional Profiler — 189
5.4.5	ADCP General Characteristics — 191
5.4.6	Acoustic Doppler Velocimeters — 191
5.5	Flow Measurements Based on Heat Transference — 196
5.5.1	Introduction to Heat Transfer — 196
5.5.2	Mass flowmeters — 197
5.5.2.1	Measuring Temperature Difference — 197
5.5.2.2	Measuring Electrical Power — 200
5.5.3	Hot Wire Anemometers — 201
5.5.3.1	Hot Film — 202
5.5.3.2	Hot Wire — 203
5.6	Coriolis Mass Flowmeters — 203
5.6.1	Introduction — 203
5.6.2	The Coriolis Flowmeter — 204
5.6.2.1	Some Characteristics of Coriolis Flowmeters — 208
5.6.2.2	Measuring Density — 208
	References — 208
6	Water Level and Groundwater Flow Measurements — 209
6.1	Water Level Measurements — 209
6.2	Wave Measurements — 209
6.2.1	Submerged Pressure Sensors — 210
6.2.2	Buoys — 211

6.2.3	Displacement Buoys (Orbital Following Buoys) —	212
6.2.4	Pitch, Roll and Heave Buoys (PHW) (Wave Slope Buoys) —	213
6.2.5	GPS Buoys —	214
6.2.6	Acoustic Level Measurements —	215
6.2.7	ADCP —	216
6.2.8	Radar —	217
6.2.9	Resistive (Conductive) —	217
6.2.10	Capacitive —	220
6.2.11	Optical —	221
6.3	Quasi Static Level Measurements —	223
6.3.1	Mechanical Systems for Measuring Level —	223
6.3.2	Radar and Acoustic Meters for Low Spatial and Temporal Resolution —	223
6.3.3	Pressure —	223
6.3.4	Applications of Quasi Static Level Measurements in Hydrology —	224
6.4	Measuring Groundwater Velocity —	224
6.4.1	Introduction —	224
6.4.2	Review of Direct Methods —	225
6.4.3	Some Quite Different Flow Measurements Needed in Hydrology —	225
6.4.3.1	Vertical Flow —	225
6.4.3.2	Horizontal Groundwater Flow —	225
6.4.3.3	Seepage Flow —	225
6.4.3.4	Flow in Remediation Works Where Velocities Are Very Low —	226
6.5	Direct Methods and Their Hydrological Applications —	226
6.5.1	Vertical Flow in Boreholes —	226
6.5.1.1	Thermal-Pulse Flowmeter —	226
6.5.1.2	Electromagnetic Flowmeter —	227
6.5.2	Flowmeters for Horizontal Groundwater —	227
6.5.2.1	Colloidal Borescope (CB) —	227
6.5.2.2	Groundwater Laser Velocimeter (GLV) —	228
6.5.2.3	Thermal Flowmeters —	230
6.5.2.3.1	Horizontal Heat Pulse Flowmeter (HHPF) —	230
6.5.2.3.2	Rotary Device Probe (RDP) —	231
6.5.2.3.3	Groundwater Acoustic Doppler Velocimeter (GADV) —	232
6.5.3	Seepage Meters —	233
6.5.4	Flow in Remediation Works Where Velocities Are Very Low —	234
6.5.4.1	In Situ Permeable Flow Sensor (ISPFS) —	234
6.5.4.2	Conductivity Flowmeters —	235
6.5.4.2.1	Point Velocity Probe —	235
6.5.4.2.2	Advection – Dispersion Velocity Meter (ADVM) —	237
6.6	Discussion —	238
6.6.1	Summary of Direct Methods Characteristics —	238
6.6.2	Limitation of Direct Methods —	239
	References —	240

7	Wind, Rain and Solar Radiation Measurements — 242
7.1	Preliminary Discussion — 242
7.2	Wind Measurements — 242
7.2.1	Introduction — 242
7.2.2	Mechanical Anemometers — 243
7.2.2.1	Aerovane — 244
7.2.2.2	Cups and Vane — 245
7.2.2.3	Electrical Information Proportional to Wind Speed and Direction — 247
7.2.3	Sonic Anemometers — 247
7.2.4	Comparisons of Anemometer Measurements — 250
7.2.4.1	Comparison of an Aerovane and a Sonic Anemometer — 250
7.2.4.2	Comparison Among Different Cup Anemometers — 251
7.3	Rain Gauges — 252
7.3.1	Introduction — 252
7.3.2	Tipping Bucket Rain Gauge — 253
7.3.3	Rain Gauges Without Moving Parts — 256
7.3.3.1	Siphon Rain Gauge — 256
7.3.3.2	Optical Rain Gauges — 258
7.3.3.3	Weighing Gauge — 259
7.3.3.4	Disdrometers — 259
7.3.3.5	Piezoelectric Disdrometer — 261
7.3.3.6	Acoustic Rain Gauge (ARG) — 262
7.3.4	Comparative Analysis of Rain Measuring Systems — 262
7.4	Instruments for Measuring Solar Radiation — 263
7.4.1	Radiation Detectors — 263
7.4.1.1	Radiation to Temperature Conversion — 264
7.4.1.2	Radiation to Electric Energy Conversion — 265
7.4.2	Instruments for Total Radiation Measurements — 265
7.4.2.1	Pyrheliometers — 265
7.4.2.1.1	Reference Pyrheliometers — 266
7.4.2.1.2	Modern Pyrheliometers — 267
7.4.2.2	Pyranometer — 268
7.4.2.3	Albedometer — 270
7.4.3	Spectral Measurements — 270
7.4.3.1	Pyrradiometers and Pyrgeometers — 270
7.4.3.2	Filtered Pyrheliometers and Pyranometers — 271
7.4.3.3	Sunphotometer — 271
	References — 271
8	Ground-Based Remote Sensing Systems — 273
8.1	Distributed Temperature Sensing (DTS) — 273
8.1.1	Introduction — 273

8.1.2	Optical Fibers —	274
8.1.3	Bragg Grating —	274
8.1.4	Scattering in F.O. —	276
8.1.4.1	Brillouin Scattering —	277
8.1.4.2	Raman Scattering —	278
8.1.5	DTS Technology in Environmental Sciences and Hydraulics —	279
8.1.6	Specifying a DTS Equipment —	280
8.2	Radar —	282
8.3	Upper-Air Remote Monitoring —	286
8.4	Wind Profilers —	287
8.5	SODAR —	288
8.5.1	General Description —	288
8.5.2	Some SODAR Characteristics —	291
8.6	Radar Wind Profiler (RWP) —	292
8.6.1	Introduction —	292
8.6.2	Operating Principle —	292
8.6.3	Height Coverage and Spatial Resolution —	293
8.6.4	Averaging Time and Accuracy —	295
8.6.5	Installation Site Characteristics —	295
8.6.6	How to Specify a RWP —	295
8.6.7	Some Additional Considerations on SODAR and RWP Measurements —	296
8.7	RASS (Radio Acoustic Sounding System) —	296
8.7.1	Introductory Explanation —	296
8.7.2	RASS Examples —	297
8.7.2.1	Example # 1 —	298
8.7.2.2	Example # 2 —	300
8.7.2.3	Example # 3 —	301
8.7.3	Summary and General Considerations about RASS Systems —	303
8.8	LIDAR (Light Detection and Ranging) —	304
8.9	Weather Radar —	309
8.10	Measurement of Sea Surface Currents —	312
8.10.1	Example # 1 —	315
8.10.2	Example # 2 —	317
8.11	Ground Penetrating Radar (GPR) —	318
	References —	322
9	Data Transmission and Storage —	325
9.1	Preliminary Discussion —	325
9.1.1	Standardization —	326
9.2	Introductory Concepts —	326
9.2.1	Data Storage —	326
9.2.2	Data Transmission —	327

9.2.3	Transmission Delay —	327
9.2.4	Data Quality and Digital Information —	328
9.2.5	Local and Remote Transmissions —	329
9.2.6	Examples of Data Transmission System Selection —	330
9.2.7	Network Topologies —	331
9.3	Data Transmission —	332
9.3.1	Analog Data Transmission —	332
9.3.2	Digital Data Transmission —	334
9.3.3	Signal Encoding —	336
9.3.4	Transmission Modes —	337
9.3.5	Serial Transmission —	340
9.3.6	Parallel Transmission —	340
9.3.7	Serial-to-Parallel and Parallel-to-Serial Conversion —	341
9.3.8	Asynchronous Transmission —	342
9.3.9	Synchronous Transmission —	343
9.3.10	Error Detection —	343
9.3.11	Error Correction —	345
9.4	Transmission Media —	345
9.5	Private Networks —	345
9.6	Public Networks —	346
9.6.1	Digital Telephony —	346
9.6.2	Global System for Mobile Communications (GSM) —	347
9.6.3	Summary on Digital Telephony —	350
9.6.4	Satellites —	351
9.6.4.1	Some Satellite Constellations —	353
9.6.4.2	Constellation A —	353
9.6.4.3	Constellation B —	354
9.6.4.4	Constellation C —	354
9.6.4.5	Inter Constellation Communications —	355
9.7	GPS (Global Positioning System) —	356
9.7.1	The Space Segment —	356
9.7.2	The Control Segment —	357
9.7.3	The User Segment —	358
9.8	Data Storage —	358
9.8.1	Storage Systems —	358
9.8.2	Comments —	360
9.9	Tips to Select a Communication Media —	360
9.10	New Trends in Data Processing and Storage —	362
9.10.1	Internet —	363
9.10.2	Cloud Computing Description —	363
9.10.3	Cloud Computing Types —	364
9.10.4	Cloud Computing Stack —	365
