<i>Preface</i>	xiii
<i>Acknowledgements</i>	xxi
PART ONE – PRELUDE	
	1
1 <i>Introduction and Outline</i>	3
1.1 The trajectory of critical development	4
The current theoretical background	4
Problems of information	5
1.2 Some observations	7
Subjectivism and institutionalism	7
Process and system	8
Determinism, purposefulness and choice	10
1.3 A systems view	12
The endogeneity of preferences and technology	13
The systems view briefly explored	18
Economics and the systems view	19
1.4 Scope and outline	21
The fate of institutional economics	21
Outline of this work	24
2 <i>On Methodology and Assumptions</i>	27
2.1 The methodological defence of neoclassical theory	28
Friedman's methodology	29
The methodology in practice	30
Criticisms of Friedman	32
The instrumentalist interpretation	33
2.2 Empiricism and beyond	35
A critique of positivism and empiricism	35
The falsificationism of Sir Karl Popper	37

## Contents

A critique of Popper's methodology	39
2.3 The fate of methodology	42
Prediction and other obsessions	42
The limits of prescriptive methodology	43
The remaining scope for appraisal	44
The residual function of evidence	47
2.4 Appendix: Friedman and the maximization hypothesis	48
PART TWO – A FAREWELL TO 'ECONOMIC MAN'	51
3 <i>Behind Methodological Individualism</i>	53
3.1 What is methodological individualism?	55
Debating methodological individualism	55
Purposeful human action	56
Causality and purpose	59
Psychological explanations of purpose	60
3.2 Critique and implications	62
Spontaneity and absentee explanation	63
The problem of infinite regress	64
Wholes and parts	66
Concluding remarks	71
4 <i>The Maximization Hypothesis</i>	73
4.1 The utility of criticizing the maximization hypothesis	74
Revealed preference and beyond	74
The 'evolutionary' argument	76
Other theoretical critiques of maximization	78
Empirical critiques of maximization	83
Evaluations of the criticisms	86
4.2 Problems with the means–ends framework	93
Ends and means	93
Adaptive ends	95
5 <i>The Rationalist Conception of Action</i>	98
5.1 Initial criticisms	101
Early critiques	101
Reason and discourse	102
A possible rationalist response	103
5.2 Cognition and the hierarchy of mind	106
Unconscious processes	106
Cognitive theory	107
Multiple levels of consciousness	109
Too little information and too much	111

## Contents

5.3	Concluding remarks	114
	The rationalist dilemma	114
	Conclusion	115
6	<i>Action and Institutions</i>	117
6.1	The impact of cognitive theory	118
	Cognition, culture and society	118
	Cognitive theory and subjectivism	121
6.2	The significance of institutions	123
	Action and institutions	123
	Habits	124
	Routinization and institutions	130
	Routines, institutions and information	131
	Orthodoxy and institutions	134
	Game theory and institutions	134
	Spontaneous order	137
6.3	Some conclusions	138
	The potential for cumulative instability	138
	The evolutionary character of institutional economics	140
	PART THREE – ELEMENTS OF AN INSTITUTIONAL ECONOMICS	145
7	<i>Contracts and Property Rights</i>	147
7.1	The concepts of exchange and property	148
	Defining exchange	148
	Exchange and institutions	149
	Individualistic conceptions of property and law	151
	Williamson's treatment of exchange	154
7.2	Critique of the utilitarian calculus	156
	Durkheim and the impossibility of pure contract	157
	Some special cases of impure contract	160
	The centrality of impure contract	162
	General remarks on trust	166
7.3	The impurity principle and the fate of capitalism	167
	Impurity and Cartesian thinking	168
	Contractual impurities: Schumpeter and Marx	169
8	<i>Markets as Institutions</i>	172
8.1	Defining the market	172
	The elusive definition	172
	Markets and institutions	173
	Types of market institution	176

## Contents

Markets and exchange	177
Some immediate theoretical consequences	177
8.2 Why do markets exist?	179
Transaction costs	180
On the limits to the growth of the market	181
8.3 Markets, prices and norms	182
The establishment of norms	184
The classical tradition	186
8.4 The impossibility of perfect competition	187
The function of conventions	188
The game-theoretic analysis of markets	191
9 <i>Firms and Markets</i>	195
9.1 Neoclassical perspectives on the firm	196
Alchian and Demsetz: the firm as a market	196
Why do firms exist?	199
Transaction costs and lack of information	201
9.2 Notes towards an alternative perspective	203
Uncertainty and transaction costs	203
Uncertainty, institutions and the firm	205
The comparative efficiency of the firm	208
Innovation and transaction costs	212
Efficiency, technology and power	213
10 <i>Expectations and the Limits to Keynes</i>	217
10.1 Expectations in the <i>General Theory</i>	218
Long-term expectations	218
Keynes' policy conclusions	220
10.2 Some limitations of the theory	221
The expecting agent	222
Firms and financiers	223
Keynes' rationalist conception of action	226
Government action	228
10.3 Austrian and rational expectations alternatives	230
The endogeneity of expectations	230
The rational expectations hypothesis	231
The Austrian theory of expectations	236
10.4 Lessons for post-Keynesian economics	239
The imperfectionist interpretation	240
Conclusion	241
11 <i>Direction and Policy Implications</i>	242
11.1 Needs and welfare	243

## *Contents*

A road to serfdom?	243
Needs and economic analysis	245
Theories of needs	247
11.2 Systems, impurity and dominance	252
Economic systems as diversified pluralities	254
The principles of impurity and dominance	256
Cybernetics and the impurity principle	257
Illustrations of the impurity principle	258
Extending the impurity principle	261
11.3 Guidelines for economic organization	262
The firm as a system	262
The conditions for innovation	267
Institutional intervention	269
<i>Notes</i>	275
<i>Bibliography</i>	306
<i>Index of Names</i>	347
<i>Index of Subjects</i>	356
