Part I	State and Changes in Dryland East Asia	1
1	State and Change of Dryland East Asia (DEA)	3
1.1	Geography, Demography and Economics in DEA	3
1.2	Climate and Land-Use Changes	10
1.3	Ecosystem Production and Evapotranspiration	14
1.4	Scientific and Societal Challenges for Adaptations in DEA	16
	References	20
2	Dryland East Asia in Hemispheric Context	23
2.1	Study Regions	23
2.2	Change Analysis of Vegetated Land Surface	25
2.3	Retrospective Trend Analysis Reveals Areas of Significant Change	26
2.4	Vegetation Change in Three Epochs	27
2.5	Land Cover Variation and Change	30
2.6	Precipitation Variation and Change	34
2.7	Conclusion	38
	References	39
3	NEESPI and MAIRS Programs in Dryland East Asia	45
3.1	Introduction	45
3.2	Contrast and Comparison	47
3.2.1	The Programs	47
3.2.2	Research Approaches	48
3.2.3	Organization Structure	49
3.2.4	Major Research Activities	49
3.3	Major Findings and Achievements	50
3.3.1	Understanding Climate Change	50
3.3.2	Understanding Societal Consequences	51
3.3.3	Understanding Ecosystem Impacts	53
3.3.4	Institutional Responses to Environmental Change	54
3.3.5	Understanding Challenges	54
3.4	Conclusions	56
	References	57

7 Dynamics of Vegetation Productivity in Dryland East Asia from 1982 to 2010 — 125

- 7.1 Introduction — 125
- 7.2 Data and Methods — 127
 - 7.2.1 AVHRR NDVI — 127
 - 7.2.2 MODIS NDVI — 128
 - 7.2.3 Land Cover Map — 129
 - 7.2.4 MERRA Reanalysis Data — 129
 - 7.2.5 Agricultural Statistics — 129
 - 7.2.6 Statistical Analysis — 131
- 7.3 Results and Discussion — 131
 - 7.3.1 Trends of Spatially-Averaged NDVI — 131
 - 7.3.2 Spatial Patterns of NDVI Trends — 135
 - 7.3.3 Climatic Drivers — 137
 - 7.3.4 Other Drivers — 139
- 7.4 Conclusions — 142
References — 143

Summary I: Contexts of Change — 149

Part II Consequences — 151

8 Impacts of Global Change on Water Resources in Dryland East Asia — 153

- 8.1 Introduction — 154
- 8.2 Key Water Resource Challenges — 157
 - 8.2.1 Distribution of Water Balances across DEA and Historical Changes — 157
 - 8.2.2 Land Use/Land Cover Change — 160
 - 8.2.3 Agricultural Irrigation and Industrialization — 163
 - 8.2.4 Climate Change — 165
- 8.3 Water Resources under Environmental Changes: Case Studies — 167
 - 8.3.1 Loess Plateau — 167
 - 8.3.2 Impacts of Future Climate Change on Runoff across DEA — 171
- 8.4 Conclusions — 174
References — 175

- 9 Examining Changes in Land Cover and Land Use, Regional Climate and Dust in Dryland East Asia and Their Linkages within the Earth System —183**
- 9.1 Introduction — 184
- 9.2 Assessment of Decadal Dust Emission Based on Historical LCLU, Regional Climate and the Regional Coupled Dust Modeling System WRF-Chem-DuMo —185
- 9.3 Observation-based Dust Climatology and Its Relationship to LCLU and Regional Climate — 194
- 9.4 A Satellite Perspective on the Last Decade — 199
- 9.5 Impacts of Dust on Human-Environment-Climate Systems — 203

- 11.1 Introduction — 245
- 11.2 Vegetation Zonation and Climate — 246
- 11.3 Climate Forcing Effect of Forests: Ambiguous Conditions at the Dryland Edges — 247
- 11.3.1 Low Elevation Xeric Limits: Vulnerable Forest-Grassland Transition — 250
- 11.3.2 Management of Forests—Plantations vs. Close to Nature Ecosystems — 251
- 11.4 Effects of Forest Management on Forest Hydrological Balances in Dry Regions: A Comparison of China and the United States — 252
- 11.4.1 China — 253

- 11.4.2 United States — 254
- 11.5 Past and Future of Forest Policy in Dryland Regions of China — 255
- 11.5.1 Causes and Consequences of Expanding Desertification — 255
- 11.5.2 Shelterbelt Development and Sand Control Programs in China — 255
- 11.5.3 Debates and Critics about the Achievements of
the Past Programs — 256
- 11.5.4 Lessons Learned from Past — 258
- 11.6 Conclusions — 258
- References — 259

12 Human Impact and Land Degradation in Mongolia — 265

- 12.1 Introduction — 266
- 12.2 Land Degradation Overview — 266
- 12.2.1 Mining Land Degradation — 267
- 12.2.2 Land Degradation by Road — 269
- 12.2.3 Pastureland Degradation and Desertification — 270
- 12.2.4 Soil Erosion of Arable Land — 272
- 12.2.5 Deforestation — 273
- 12.2.6 Soil Pollution — 274
- 12.3 Use of Fallout Radionuclide Methods for Soil Erosion Study — 274
- 12.4 Conclusions — 278
- References — 279

13 The Effect of Large-Scale Conservation Programs on the Vegetative Development of China's Loess Plateau — 283

- 13.1 Introduction — 284
- 13.2 Conservation Programs — 285
- 13.3 Study Region — 286
- 13.3.1 Loess Plateau — 286
- 13.3.2 Subset for Fine Scale Analysis — 287
- 13.4 Data — 288
- 13.4.1 MODIS Data — 288
- 13.4.2 Landsat Data — 289
- 13.4.3 Grazing Statistics — 290
- 13.4.4 Anthromes — 290
- 13.5 Methods — 293
- 13.6 Results and Discussion — 293
- 13.6.1 Vegetation Index and Albedo Changes — 293
- 13.6.2 500 m NDVI Changes — 296
- 13.6.3 Grazing Intensity Change — 298
- 13.7 Conclusions — 302
- References — 303

Summary II: Consequences — 307

Part III Solutions/Adaptations — 309**14 Monitoring and Assessment of Dryland Ecosystems with Remote Sensing — 311**

- 14.1 Problems of Land Degradation and Desertification in Drylands: Current Challenges and Perspectives — 312
- 14.2 Indicators of Land Degradation/Desertification and Their Detection by Remote Sensing — 318
- 14.2.1 History of Degradation/Desertification Indicator Development in Recent Decades — 318
- 14.2.2 Retrieving Biophysical Spectral Information with Remote Sensing for DLDD — 322
- 14.2.3 Bio-physiological Indexes for Assessment and Monitoring — 329
- 14.3 Review of Available Sensors and Data over DEA and Their Suitability for Detecting Desertification Indicators — 332
- 14.3.1 Short Outlook on Future Satellite Sensors over DEA — 335
- 14.4 Remote Sensing Approach for Desertification Assessment in Central Asia: History, Current Research, and Perspectives—A Case Study — 337
- 14.5 Conclusions — 342
References — 343

15 The Effects of Spatial Resolution on Vegetation Area Estimates in the Lower Tarim River Basin, Northwestern China — 351

- 15.1 Introduction — 351
- 15.2 Study Area — 353
- 15.3 Methodology — 354
- 15.4 Results and Discussion — 356
- 15.5 Conclusions — 360
References — 361

16 New Ecology Education: Preparing Students for the Complex Human- Environmental Problems of Dryland East Asia — 363

- 16.1 Introduction — 364
- 16.2 Description of New Ecology Education — 365
- 16.2.1 Topic 1: What's Going On? (Conceptual Models) — 369
- 16.2.2 Topic 2: Life Is So Confusing! (Nonlinearity) — 370
- 16.2.3 Topic 3: Everything Is Connected to Everything Else (Systems Thinking) — 374
- 16.2.4 Topic 4: Climbing Up-and-Down the Complexity Ladder (Hierarchy Theory) — 376

16.2.5	Topic 5: What Does It Take to Change This System? (Resilience) — 378
16.2.6	Topic 6: Coping with Land Degradation in Drylands (Ecosystem Services) — 382
16.2.7	Topic 7: Unraveling the Complexity of Coupled H-E Systems and Desertification (The Drylands Development Paradigm) — 386
16.2.8	Topic 8: Where Art, Science, and Craft Meet (Ostrom's Framework) — 392
16.3	Conclusions — 394 References — 396
17	Grassland Degradation and Restoration in Inner Mongolia Autonomous Region of China from the 1950s to 2000s: Population, Policies and Profits — 405
17.1	Introduction — 405
17.2	Population and Urbanization in IM — 407
17.2.1	Population Evolution — 408
17.2.2	Population and Over-Grazing — 409
17.2.3	Urbanization and Restoration — 410
17.3	Policy, Laws and Regulation for Grassland — 412
17.4	From Production to Profits — 414
17.4.1	Animal Husbandry — 414
17.4.2	Tourism Development — 416
17.4.3	Environmental Service — 418
17.5	Conclusions — 418 References — 420
18	Sustainable Governance of the Mongolian Grasslands: Comparing Ecological and Social-Institutional Changes in the Context of Climate Change in Mongolia and Inner Mongolia Autonomous Region, China — 425
18.1	Introduction — 426
18.2	Explanatory Models of Grassland Dynamics — 427
18.3	Analyses and Results — 429
18.3.1	Collectivization of Pastures and Livestock — 431
18.3.2	Privatization and Market Incentives — 434
18.3.3	Recentralization of Grassland Management in IM, China — 436
18.3.4	Changing Roles of the State, Market and Community for Grassland Management — 437
18.3.5	Climate Variability and Change: History and Future — 438
18.4	Discussion — 439
18.5	Conclusions — 442 References — 443

19	Adaptive Management of Grazing Lands	—447
19.1	Introduction	— 447
19.2	Distribution of Grazing Lands and Problems	— 450
19.3	Case Study and Adaptive Management in IM	— 451
19.3.1	Study Site	— 451
19.3.2	The ACIAR-Model	— 452
19.3.3	Typical Farm	— 453
19.3.4	Economic Stocking Rate	— 453
19.3.5	Improved Feeding of Livestock during Winter and Spring	— 454
19.3.6	Changing Lambing Time	— 456
19.3.7	Use of Warm Sheds during Cold Seasons	— 458
19.4	Conclusions and Discussion	— 460
	References	— 463
	Summary III: Solutions and Adaptations	—465
	Index	—467
