List of Tables

Table 4.1: A comparison between mechanical system and natural computer —— 67
Table 4.2: Vibrant matter compared with atomism —— 69
Table 6.1: Birth – from 0 s to 5 min following addition of sodium hydroxide droplet to olive oil phase —— 88
Table 6.2: Life – primary morphologies from 0–30 s following addition of 0.2 ml droplet of sodium hydroxide to oil phase —— 89
Table 6.3: Life – primary behaviours from 0–30 s following addition of 0.2 ml droplet of sodium hydroxide to oil phase —— 90
Table 6.4: Death – from 0–30 s following addition of 0.2 ml droplet of sodium hydroxide to oil phase —— 91
Table 6.5: Manipulation of Bütschli system: Internal programming —— 106
Table 6.6: Manipulation of Bütschli system: External programming —— 106
Table 8.1: Incubator Flask preparation for a 250 ml flask —— 143
Table 8.2: Carbon Eater preparation for a 250 ml flask —— 149
Table 8.3: Liesegang ring plates: Evolving diffusion–precipitation reactions —— 153
Table 8.4: Hygroscopic preparation for a 250 ml tumbler —— 160
Table 8.5: Biofaction installation preparation for a 45,000 ml tank —— 163
Table 8.6: Liesegang scaffolding preparation —— 177
Table 8.7: Traube scaffolding preparation —— 177
Table 10.1: Barium carbonate protopearls preparation —— 215
Table 10.2: Calcium carbonate protopearls preparation —— 215
Table 16.1: Architectural pillars of certainty —— 291
Table 16.2: Comparing design in probabilistic and deterministic paradigms —— 297
Table 16.3: Designing with process as material —— 298
Table 16.4: Design characteristics of lifelike systems —— 303
