

# Index

approximate solution, 82  
asymptotic cone, 29

Bouligand tangent cone, 23

Clarke normal cone, 149  
Clarke tangent cone, 149  
cone, 18  
conic hull, 28  
convex hull, 28  
convex set, 18

extremal system, 178

Fréchet normal cone, 160  
function  
– coercive, 81  
– continuous, 7  
– contraction, 53  
– convex, 30  
– differentiable, 10  
– Lipschitz, 8  
– locally Lipschitz, 122  
– lower semicontinuous, 74  
– strictly convex, 37  
– support, 133  
– uniformly continuous, 8  
– upper semicontinuous, 74  
– weak contraction, 58

Hessian matrix, 12

inequality  
– Carleman, 50  
– Hölder, 45  
– Hardy, 47  
– Hermite-Hadamard, 42  
– Jensen, 40  
– Kantorovici, 51  
– mean, 44  
– Minkowski, 45  
– Young, 45

Jacobian matrix, 11

Lagrangian, 97

least squares method, 113

Mordukhovich normal cone, 160

polar set, 21  
projection  
– Mangasarian-Fromovitz, 20  
proximal point algorithm, 212

qualification condition, 98  
– Guignard, 102  
– linear independence, 102  
– Mangasarian-Fromovitz, 102  
– quasiregularity, 102  
– Slater, 108

saddle point, 99  
set  
– closed, 2  
– compact, 2  
– of critical directions, 109  
– open, 2  
solution, 78

speed of convergence  
– Aitken acceleration method, 202  
– line search algorithm, 208  
– Newton method, 203  
– Picard iterations, 198  
– quadratic programming, 209  
strict local solution, 89  
subdifferential  
– Clarke, 135  
– convex, 120  
– Fréchet, 167  
– Mordukhovich, 169

theorem  
– Banach fixed point Principle, 54  
– barrier method, 219  
– Beardon, 69  
– Cantor, 8  
– Carathéodory, 28  
– Cauchy, 4  
– Cauchy Rule, 14  
– Cesàro Lemma, 3

- Ekeland Variational Principle, 83
  - exact extremal principle, 179
  - Farkas Lemma, 21
  - Fermat, 13
  - Fermat rule for Clarke calculus, 142
  - Fermat rule for Mordukhovich calculus, 174
  - First-order necessary optimality condition, 86
  - Fritz John: Clarke calculus case, 156
  - Fritz John: convex case, 128
  - Fritz John: Mordukhovich calculus case, 193
  - Fritz John: smooth case, 92
  - Graves, 72
  - Hahn-Banach, 10
  - Implicit Function Theorem, 13
  - Karush-Kuhn-Tucker: convex case, 130
  - Karush-Kuhn-Tucker: smooth case, 96
