

List of Figures

- Figure 1.1** Number of deaths, crude and age adjusted rates United States (CDCNCHS, National Vital Statistics Systems, 2010 – modified) — 4
- Figure 2.1** Three pathways for the study of health and behaviour (Leventhal et al., 2006) — 11
- Figure 2.2** PAMM distinct stages (Weinstein et al., 2008) — 14
- Figure 2.3** HAPA model (Schwarzer, 2008) — 15
- Figure 2.4** Streams of influence in Theory of Triadic Influence (Faly, Snyder, & Petraitis, 2009) — 17
- Figure 4.1** Proposed research model — 32
- Figure 4.2** Proposed research model – mediating models (Q5, Q6) — 32
- Figure 4.3** Diagram of relationships in the classic mediation analysis (Baron & Kenny, 1986) — 43
- Figure 4.4** The weakest links in the chain of the studied health behaviours of the respondents (in percentages of respondents) — 52
- Figure 4.5** The strongest links in the chain of the studied health behaviours of the respondents (in percentages of respondents) — 53
- Figure 4.6** Accumulation of healthy behaviours (percentages of respondents) — 55
- Figure 4.7** Accumulation of risk behaviours (percentages of respondents) — 55
- Figure 4.8** Representation of students and professionals in clusters (percentages) — 57
- Figure 4.9** Representation of each studied groups in clusters (percentages) — 57
- Figure 4.10** NI12, physical activity and career stage or studied groups interaction (two-way ANOVA results) — 59
- Figure 4.11** NI3, physical activity and career stage or studied groups interaction (two-way ANOVA results) — 61
- Figure 4.12** Smoking, physical activity and career stage or studied groups interaction (two-way ANOVA results) — 62
- Figure 4.13** Alcohol consumption, physical activity and career stage or studied groups interaction (two-way ANOVA results) — 63
- Figure 4.14** Alcohol consumption, nutrition status (NI12) and career stage or studied groups interaction (two-way ANOVA results). — 64
- Figure 4.15** Alcohol consumption, nutrition status (NI3) and career stage or studied groups interaction (two-way ANOVA results) — 65
- Figure 4.16** Smoking, nutrition status (NI12) and career stage or studied groups interaction (two-way ANOVA results) — 66
- Figure 4.17** Smoking, nutrition status (NI3) and career stage or studied groups interaction (two-way ANOVA results) — 68
- Figure 4.18** Self-rated Health of respondents in each health behaviour profile — 70
- Figure 4.19** Internal Health Locus of Control (IHLOC) differentiation of health behaviours profiles — 71
- Figure 4.20** Chance Health Locus of Control (CHLOC) differentiation of Health Behaviours Profiles — 71
- Figure 4.21** Risky waist circumferences (percentages of respondents) — 80
