

## Acknowledgements

I express my profound gratitude to my wife Adriana for her continuous and unconditional help and support.

I am grateful to Professor Dr. Zoran S. Petrović, Research Director of Kansas Polymer Research Center (between 1994 and 2014), unanimously recognised as a world leader in the area of renewable polyols and polyurethanes based on natural compounds, for his continuous support and capability to open new valuable directions for scientific investigations.

I thank my colleagues from Kansas Polymer Research Center: Dr Andy Myers, Dr Ivan Javni, Dr Jian Hong, Dr Ram Gupta, Xianmei Wan, Alisa Zlatanić, Dragana Radojčić, Nikola Bilić, Olivera Bilić and others, for helpful discussions, for synthesis and characterisation of new renewable polyols and of biobased PU from these polyols.

I would like to thank Mrs Ria Fritz from DeGruyter and to Miss Suruthi Manogarane from Integra-PDY IN, for their effort, high competency and professionalism in producing the third edition of the book *Polyols for Polyurethanes – Chemistry and Technology* into two high-quality volumes.
