

Index of Volume 11 (1991)

Number 1

Alfred M. Grundland and Bohdan Lawruk

The Lagrange-Riemann method for integration of quasilinear partial differential equations 1

Gerd Herzog

On universal functions and interpolation 21

Rainer Brück

Summability of sequences of polynomial interpolants in the roots of unity 27

George A. Anastassiou, Claudia Cottin and Heinz H. Gonska

Global smoothness of approximating functions 43

J. A. Fridy and H. I. Miller

A matrix characterization of statistical convergence 59

Tran Duc Van, Ha Huy Bang and R. Gorenflo

On Sobolev-Orlicz spaces of infinite order for a full Euclidean space 67

Hans-Christoph Grunau

The Dirichlet problem for some semilinear elliptic differential equations of arbitrary order 83

Arnold Knopfmacher and Lutz Lucht

The radius of convergence of power product expansions 91

Number 2/3

Simson Baron

Summability factors with a rate and multipliers of double Fourier series of Lipschitz classes 101

Norbert Steinmetz

Linear differential equations with exceptional fundamental sets 119

Saverio Salerno and Antonio Vitolo

$p+2$ with few and bounded prime factors 129

S. M. Mazhar

Approximation by the partial sums of Fourier series 149

Abhay K. Gaur and Zdislav V. Kovářík

Norms, states and numerical ranges on direct sums 155

A. Sharma, J. Szabados and R. S. Varga

Some 2-periodic trigonometric interpolation problems on equidistant nodes 165

Werner Varnhorn

Zur Konstruktion einer numerischen Lösung des Anfangsrandwertproblems für die nicht-linearen Gleichungen von Navier – Stokes 191

Lyubomir Boyadjiev

On series in Laguerre and Hermite polynomials 209

Alfred M. Grundland and Peter J. Vassiliou

On the solvability of the Cauchy problem for Riemann double-waves by the Monge-Darboux method 221

Number 4

Johann Boos and Toivo Leiger

Consistency theory for operator valued matrices 279

Árpád Elbert, Andrea Laforgia and Lee Lorch

Additional monotonicity properties of the zeros of Bessel functions 293

A. K. Snyder and Gary S. Stoudt

Basis in Banach space, strictly cosingular maps, and the Wilansky property 301

Peter Köhler

Dual approximation methods and Peano kernels 323

Yoshihiro Mizuta

Fine limits of potentials 345

Wolfram Jérôme Luther

Abelsche und Taubersche Sätze für Laguerre-Reihen 383

Horst Alzer

Corrigendum to: On an extension of Leibniz' product rule 395
