

## Index of Volume 15 (1995)

### Number 1

- Harold G. Diamond, H. Halberstam, H.-E. Richert*  
Monotonicity of the zero of the sieve auxiliary function  $\tilde{\chi}_\kappa$  in the range  $3/2 < \kappa < 2$  . . . . . 1
- Ha Huy Bang*  
A property of entire functions of exponential type . . . . . 17
- Thomas Töpfer*  
Arithmetical properties of functions satisfying  $q$ -difference equations . . . . . 25
- Thomas Sturzenhecker*  
 $L^\infty$ -estimates for capillary surfaces . . . . . 51
- Norio Yoshida*  
Forced oscillations of nonlinear parabolic equations with functional arguments . . . . . 71
- Erhard Heinz*  
Über Ungleichungen von T. Radó . . . . . 85
- Jürgen Appell, Alois Kufner*  
On the two-dimensional Hardy operator in Lebesgue spaces with mixed norms . . . . . 91

### Number 2

- Rauno Aulaskari, Jie Xiao, Ruhan Zhao*  
On subspaces and subsets of BMOA and UBC . . . . . 101
- Chris Pladdy, Yoshimi Saitō, Tomio Umeda*  
Resolvent estimates of the Dirac operator . . . . . 123
- Kirill Kopotun*  
A note on simultaneous approximation in  $L_p$   $[-1, 1]$  ( $1 \leq p < \infty$ ) . . . . . 151
- Jerzy Kaczorowski*  
On the distribution of primes (mod 4) . . . . . 159
- Mirosljub Jevtić*  
Carleson measures in BMO . . . . . 173
- J. K. Langley*  
On entire solutions of linear differential equations  
with one dominant coefficient . . . . . 187

**Number 3**

- Franz Locher, Michael-Ralf Skrzipek*  
A stability test for complex polynomials ..... 205
- Gerhard Ströhmer*  
An eigenvalue problem related to viscous flow ..... 221
- Johannes C. C. Nitsche*  
Characterizations of the mean curvature and a problem of G. Cimmino ..... 233
- Stefan Reitz*  
On connectivity numbers of stable domains ..... 247
- Walter Bergweiler*  
On the Julia set of analytic self-maps of the punctured plane ..... 251
- Burkhard J. Schmitt*  
The poloidal-toroidal representation of solenoidal fields in spherical domains ..... 257
- J. M. R. Méndez-Pérez, G. Miquel Morales*  
On the convolution theorem of the finite Legendre transform in a Zemanian space .... 279
- Kecheng Liao*  
Controlled convergence theorems for Henstock-Kurzweil integration ..... 297

**Number 4**

- Simson Baron, Rüdiger Kiesel*  
Absolute  $\varphi$ -summability factors with a power for  $A^\alpha$ -methods ..... 311
- Werner Georg Nowak*  
On sums and differences of two relative prime cubes ..... 325
- Konrad Horst Wilhelm Küfner*  
Global existence for a certain strongly coupled  
quasilinear parabolic system in population dynamics ..... 343
- B. Scarpellini*  
The principle of linearized instability for space-periodic equilibria  
of Navier-Stokes on an infinite plate ..... 359
- Wilhelm Merz, Jianhua Zhang*  
A free boundary problem associated with oxidation of silicon ..... 393

*Hans Volkmer*

Frames of wavelets in Hardy space ..... 405

*Martin Reinders*

On the zeros of  $W(g, g', \dots, g^{(n-1)})$  ..... 423

*J. K. Langley*

Corrections to „On entire solutions of linear differential equations  
with one dominant coefficient”. ..... 433

# Analysis

Volume 15 · Issue 4 · 1995

<i>Simson Baron, Rüdiger Kiesel</i> Absolute $\varphi$ -summability factors with a power for $A^\alpha$ -methods .....	311
<i>Werner Georg Nowak</i> On sums and differences of two relative prime cubes .....	325
<i>Konrad Horst Wilhelm Küfner</i> Global existence for a certain strongly coupled quasilinear parabolic system in population dynamics .....	343
<i>B. Scarpellini</i> The principle of linearized instability for space-periodic equilibria of Navier-Stokes on an infinite plate .....	359
<i>Wilhelm Merz, Jianhua Zhang</i> A free boundary problem associated with oxidation of silicon .....	393
<i>Hans Volkmer</i> Frames of wavelets in Hardy space .....	405
<i>Martin Reinders</i> On the zeros of $W(g, g', \dots, g^{(n-1)})$ .....	423
<i>J. K. Langley</i> Corrections to „On entire solutions of linear differential equations with one dominant coefficient” .....	433
Author Index on Volume 15 .....	435
