

Index of Volume 19 (1999)

Number 1

- A. Sharma, Z. Ziegler*
Hermite interpolation on some perturbed roots of unity 1
- Eleutherius Symeonidis*
The Poisson integral as an appropriate mean value 13
- Farit Avhadiev, Karl-Joachim Wirths*
Estimates of derivatives in an α -invariant set of analytic functions 19
- Kamel Betina*
Sur l'équation de Riccati 29
- Toshiaki Hishida*
The Stokes operator with rotation effect in exterior domains 51
- Nicholas Danikas, Stephan Ruscheweyh*
Semi-convex hulls of analytic functions in the unit disk 69
- M. H. Annaby, A. G. García, M. A. Hernández-Medina*
On sampling and second order difference equations 79
- Peter Bundschuh*
Again on the irrationality of a certain infinite product 93

Number 2

- Visa Latvala*
On subclasses of $BMO(B)$ for solutions of quasilinear elliptic equations 103
- Fei-tsen Liang*
On the minimum number of components divided by the level set through a
critical point of the subtraction of two solutions of the equation of
constant mean curvature 117

Saib Othman

Analytic solutions of a parabolic evolution system of partial differential equations coupled with a hyperbolic equation 143

László Leindler

On the sharpness of inequalities given by W. Luh and R. Trautner 165

G. Frank, J. K. Langley

Pairs of linear differential polynomials 173

Walter Kurt Haymann

On a conjecture of Korenblum 195

Number 3

Hermann Render, Andreas Sauer

Maximal domains of summability for holomorphic functions 207

V. A. Menegatto

Strict positive definiteness on spheres 217

Friedrich Sauvigny

Introduction of isothermal parameters into a Riemannian metric by the continuity method 235

D. Naylor

On an asymptotic expansion of the Kontorovich-Lebedev transform 245

Manfred Peter

A Remark on a hypothetical generalization of Selberg's trace formula 259

Kazuya Tōhge

Logarithmic derivatives of meromorphic or algebroid solutions of some homogeneous linear differential equations 273

Yoji Noda

Holomorphic families of Möbius transformations 299

Number 4

<i>Nicholas Danikas, Stephan Ruscheweyh</i> Semi-convex hulls of analytic functions in the unit disk	309
<i>Farid Bahrami, Arsalan Chademan</i> Existence of a uniform bound for quadrature domains associated to p -Laplacian	319
<i>M. T. Carroll</i> Invariance of the Wilansky property	327
<i>Hasi Wulan</i> α -Yosida functions and meromorphic solutions of algebraic differential equations	341
<i>B. Klares</i> General linear difference systems	347
<i>Elias G. Saleeby</i> Entire and meromorphic solutions of fermat type partial differential equations	369
<i>Xiaochun Fang</i> The simplicity and real rank zero property of the inductive limit of continuous trace C^* -algebras	377
<i>S. P. Zhou</i> On monotone rational approximation: A new approach	391
<i>Martin Väth, Petr P. Zabrejko</i> A theorem about differentiability of solutions of ordinary differential equations with respect to a parameter	397
