DE GRUYTER

ADVANCES IN PURE AND APPLIED MATHEMATICS accepts submissions from pure mathematics, in particular in all branches of analysis. Also, the journal welcomes articles from applied mathematics, in particular in the areas of applied harmonic analysis (mathematical aspects of signal processing, timefrequency analysis methods, uncertainty principles, sampling theory) and mathematical physics (methods, partial differential equations, dynamical systems, mathematical and numerical aspects of inverse problems).

All information regarding notes for contributors, subscriptions, Open access and orders is available online at www.degruyter.com/apam.

ABSTRACTED/INDEXED IN Mathematical Reviews and Zentralblatt MATH.
