Two eminent chemists invite you to share in Nobel committee deliberations: who should win the first retro-Nobel Prize for the discovery of oxygen? And what counts as discovery anyway?

Following a successful Canadian premiere in Toronto in January, the Stillman Drake History of Science players will plunge you into the middle of the priority dispute. Committee members double as their 1777 protégés to dramatize the claims of Lavoisier, Priestley, and Scheele.

The human side of chemical research is enhanced as the accompanying spouses support and promote their husbands' work.

Production generously subsidized by IUPAC
