

## Contents

Włodzimierz BORGIEL: Geometric $F$ -object and a local coordinate system	189—208
Paweł WALCZAK: A proof of some theorem on the infinitely differentiable functions of one variable which are not analytic . . . . .	209—213
Daniel SIMSON: Some remarks on the ring of structural numbers . . .	215—222
Izydor DZIUBIŃSKI: The symmetrical quasi-starlike functions . . . .	223—245
Izydor DZIUBIŃSKI, Lucjan SIEWIERSKI: Sharp estimation of the coefficients of quasi-starlike functions close to identity . . . . .	247—250
Krystyna DOBROWOLSKA: On $k$ -symmetric quasi-starlike meromorphic functions . . . . .	251—266
