Contents

Editorial
Eleonora Bottani, Francesco Longo, Ruben Mercadé-Prieto and Giuseppe Vignali
Special Issue "Selected Papers from the First International Food Operations & Processing Simulation Workshop – FoodOPS 2015 (September 21–23, 2015, Bergeggi, Italy)" — 805

Special Section: Articles from the first FoodOPS 2015
David Mosna, Giuseppe Vignali, Eleonora Bottani and Roberto Montanari
Life Cycle Assessment of a New Feed Production Obtained by Wasted Flour Food Collected from the Distribution and Retail Phases — 807

Demetrio Laganà, Francesco Longo and Francesca Vocaturo
Vendor-Managed Inventory Practice in the Supermarket Supply Chain — 827

Benjamin A. Kotzur, Michael S. A. Bradley, Robert J. Berry and Richard J. Farnish
Breakage Characteristics of Granulated Food Products for Prediction of Attrition during Lean-Phase Pneumatic Conveying — 835

Mattia Armenzoni, Eleonora Bottani, Marta Rinaldi, Sergio Amedeo Gallo and Roberto Montanari
Analysis, Simulation and Optimization of the Milking Process in a Cowshed for the Production of Parmigiano Reggiano — 851

Massimiliano Rinaldi, Matteo Cordioli, Davide Barbanti and Marco Dall’Aglio
Study and Optimization of a CO₂ Sparger for Carbonated Beverages and Beer by Means of CFD Modeling — 867

Simone Spanu, David Mosna and Giuseppe Vignali
CFD Analysis of Coffee Packaging in Capsules using Gas Flushing Modified Atmosphere Packaging — 875

Regular Research Articles
Myeong Gi Lee and Won Byong Yoon
Developing an Effective Method to Determine the Heat Transfer Model in Fish Myofibrillar Protein Paste with Computer Simulation Considering the Phase Transition on Various Dimensions — 889

Amin Ziaforoughi, Ali Reza Yousefi and Seyed M.A. Razavi
A Comparative Modeling Study of Quince Infrared Drying and Evaluation of Quality Parameters — 901

Zhao-qi Zheng, Li-jun Wang, Dong Li, Zhi-gang Huang, Benu Adhikari and Xiao Dong Chen
Mechanical and Thermal Properties of Polyurethane Foams from Liquefied Sugar Beet Pulp — 911

Cansu Tamer, Asli Isci, Naciye Kutlu, Ozge Sakiyan, Serpel Sahin and Gulum Sumnu
Effect of Drying on Porous Characteristics of Orange Peel — 921
