it – Information Technology is a strictly peer-reviewed scientific journal. It is the oldest German journal in the field of information technology. Today, the major aim of **it – Information Technology** is highlighting issues on ongoing newsworthy areas in information technology and informatics and their application. It aims at presenting the topics with a holistic view. It addresses scientists, graduate students, and experts in industrial research and development.

it – Information Technology is the organ of the faculties Technical Informatics and Computer Science in the Life Sciences of the German Informatics Society (GI – Gesellschaft für Informatik e.V.) and faculty Technical Informatics of the Information Technology Society (ITG) within the VDE (Verband der Elektrotechnik, Elektronik und Informationstechnik e.V.).

it – Information Technology was founded as **Elektronische Rechenanlagen** in 1959. To live up to the changes in the scientific and technological world it changed its name and shape several times. In 1986 it became **it – Informationstechnik** and **it+ti – Informationstechnik und Technische Informatik** in 1993. In 2002, the journal got the current name **it – Information Technology**.
