

Index of Volume 13 (1995)

Number 1

<i>B. Droge, T. Georg</i> On selecting the smoothing parameter of least squares regression estimates using the minimax regret approach	1
<i>A. Carbonez, L. Györfi, E. C. van der Meulen</i> Partitioning-estimates of a regression function under random censoring	21
<i>E. Stoimenova</i> On the LFC of the natural classification rule under a new loss function	39
<i>M. S. Mulekar</i> Selecting best negative binomial population using two distance measures	53
<i>E. Gombay</i> Nonparametric truncated sequential change-point detection	71
<i>F. Marohn</i> Neglecting observations in Gaussian sequences of statistical experiments	83
Book Reviews	93

Number 2

<i>B. L. Granovsky, H. G. Müller, C. Pfeifer</i> Some remarks on optimal kernel functions	101
<i>T. Q. Viet</i> Some adaptive estimators in simple regression models	117
<i>J. K. Ghosh, R. Mukerjee</i> Frequentist validity of highest posterior density regions in the presence of nuisance parameters	131
<i>D. Noll</i> Rates of convergence for best entropy estimates	141
<i>J. P. Kowalski</i> Complete classes of tests for some nonparametric hypotheses	167

- R. J. Karunamuni, H. Yang*
On convergence rates of monotone empirical Bayes tests for the continuous
one-parameter exponential family 181
- J. Hurt, B. Novák, W. Wertz*
Invariantly optimal look on reliability estimation in the exponential case 193

Number 3

- B. L. S. Prakasa Rao, A. Sen*
An application of the 'martingale methods' to non-parametric regression
based on censored data 201
- C. Hennig*
Efficient high-breakdown-point estimators in robust regression:
which function to choose? 221
- S. Purkayastha*
On the asymptotic efficiency of the sample circular median 243
- T. Kato*
Asymptotic sufficiency of posterior densities with respect to Kullback
information under marginal probabilities 253
- D. Dehay*
Asymptotic behavior of estimators of cyclic functional parameters
for some nonstationary processes 273
- W. Bischoff, W. Fieger, S. Wulfert*
Minimax- and Γ -minimax estimation of a bounded normal
mean under LINEX loss 287

Number 4

- Jine-phone Chou*
Admissibility of conjugate Bayes estimators for
the mean of a negative binomial distribution 301
- K. Shafie, S. Noorbaloochi*
Asymmetric unbiased estimation in location families 307

<i>D. Ríos Insua, F. Ruggeri, B. Vidakovic</i> Some results on posterior regret Γ -minimax estimation	315
<i>S. Basu, A. DasGupta</i> Robust Bayesian analysis with distribution bands	333
<i>A. Bose, N. Mukhopadhyay</i> Sequential estimation of the mean of an exponential distribution via replicated piecewise stopping number	351
<i>A. T. Martinsek</i> Estimating a slope parameter in regression with prescribed proportional accuracy	363
<i>G. Ennadifi</i> Asymptotic behaviour of record times for renewal paced records	379
Book Reviews	399
Referees of Volume 13 (1995) of S & D	405
Author Index of Volume 13	407
