Two eminent chemists invite you to share
in Nobel committee deliberations: who
should win the first retro-Nobel Prize for
the discovery of oxygen? And what counts
as discovery anyway?

Following a successful Canadian premiere
in Toronto in January, the Stillman Drake History
of Science players will plunge you into the middle
of the priority dispute. Committee members
double as their 1777 protégés to dramatize
the claims of Lavoisier, Priestley, and Scheele.

The human side of chemical research is en-
hanced as the accompanying spouses support
and promote their husbands' work.

Production generously subsidized by IUPAC
