

## Contents

Poonam SHARMA: On the order of an entire function of several complex variables represented by multiple Dirichlet series . . . . .	1-10
Józef SŁOMIŃSKI: On the satisfiabilities and varieties for abstract algebras induced by the cones and functor dynamics . . . . .	11-20
Liviu NICOLESCU: Quasi-connexions de Gołąb . . . . .	21-31
Grzegorz RZĄDKOWSKI: An $L^2$ -angle between plane sectors . . . . .	33-45
B.G. PACHPATTE: On certain new discrete inequalities . . . . .	47-60
Tadeusz KOSTRZEWSKI: Existence and uniqueness of BC $[a, b]$ solutions of nonlinear functional equation . . . . .	61-74
Galina B. BELYAVSKAYA: On concept of centre in quasigroups . . . . .	75-84
Efstathios VASSILIOU: On a class of principal bundles over symplectic bases on euclidean spaces . . . . .	85-92
Andrzej TRAFNY: Bundles, linear bundles and principal bundles in the category of differential spaces . . . . .	93-101
Danut MARCU: Note on the domination number of a graph . . . . .	103-105
Danuta STACHOWIAK-GNIŁKA: On some topological properties of $\varphi(L)$ space. Galina PLOTNIKOVA-KHMELEVSKAJA: Analysis of bifurcation of periodic solutions by Poincaré's method . . . . .	107-115
Janusz JANUSZEWSKI: On Volterra integral equations with weakly singular kernels in Banach spaces . . . . .	117-129
Maria LUPA: On solutions of a functional equation in a special class of functions Z. DZEDZEJ, B.D. GELMAN: Dimension of the solution set for differential inclusions . . . . .	131-136
ZUN-QUAN XIA: On quasidifferential kernels . . . . .	137-147
Nguyen CANG, Nguyen KIM TAN: Optimisation d'une classe de systèmes discrets	149-158
Lidia SKÓRA: Systems of ordinary differential-functional inequalities . . . . .	159-182
Alphonse MBA, Jean WOUAFO KAMGA: Prolongement tangent de feuilletages . .	183-190
Wojciech HERER: A characterization of uniformly distributed random variable .	191-202
Julian MUSIELAK: On generalized absolute convergence of some trigonometric gap series . . . . .	203-206
Lech T. POLKOWSKI: On exotic points in Cech-Stone compactifications . . . .	207-212
Agnieszka PLUCIŃSKA, Edmund PLUCIŃSKI: Some properties of Hermite polynomials of a Wiener process . . . . .	213-220
Dietmar DORNINGER: Algebraic analysis of chromosome order . . . . .	221-228
Helmut LÄNGER: Construction of observables and existence of joins and meets in the poset of observables . . . . .	229-235
Marian MAJCHROWSKI: On inverse problems with nonlocal condition for parabolic systems of partial differential equations and pseudoparabolic equations .	237-248
	249-254
	255-274
