

## Contents

Andrzej ADAMSKI: On the representability of functions in the form of a sum, product, and a product of sums . . . . .	5—14
Anna WĘGRZYŃSKA: Conditions nécessaires et suffisantes pour l'existence de champs tensoriels récurrents asymétriques du type (0,2) dans l'espace à quatre dimensions . . . . .	15—44
Stanisław KIEŁTYKA, Wiesław SOBIESZEK: A generalization of the theorem on directional derivative for the maximum functional nad its application . . . . .	47—59
Marian JASZCZAK: On some generalization of the notion of decomposable tensor in a locally decomposable Riemannian space . . . . .	61—63
K. D. SINGH, R. K. VOHRA: Invariant submanifolds of an $(\tilde{f}_{(1)}, \tilde{f}_{(2)})$ -manifold . . . . .	65—76
Józef KALINOWSKI: On the convergence of an iterative sequence to the solution of a system of ordinary differential equations with deviated arguments . . . . .	77—93
Zbigniew OLSZAK: On totally umbilical submanifolds of Cartan-symmetric manifolds . . . . .	95—103
Jerzy CHMAJ: Non-linear boundary value problem of statics in the theory of elasticity for multiply connected domain . . . . .	105—117
Józef TABOR: On the translation equation occurring in the iteration theory	119—127
Lothar BERG: The method of reducing the order of linear operation equations . . . . .	129—134
Henryk ADAMCZYK, Jan NAWROCKI: On some non-linear system of integral-functional equations . . . . .	135—145
Katarzyna LITEWSKA: Обобщенные решение задачи Дирихле для некоторой эллиптической системы . . . . .	147—152

## Directions for Authors

Papers may be submitted to the Editor in English, French, German or Russian, exceptionally in Polish, and should be typed with double spacing on a good quality paper. Manuscripts in small type cannot be accepted. They should not exceed twenty typed pages. Preferably two copies (original and a ribbon or Xerox copy) should be submitted. Formulas and indices should be written generous spacing and typed if possible; symbols which are not on the typewriter should be inserted by hand in Indian ink. Oblique dash / should not be used in place of parantheses ( ). Special attention should be paid to distinguishing 1 (number) from l (letter). Formulas should be numbered on the left-hand side of the line. The heading of the paper should consist of the author's name followed by surname, in the next line the title of the paper in capitals. Section titles should be written without indention and underlined. Words such as *theorem*, *lemma*, *proof*, *corollary*, *remark*, *example* should be typed in normal text with a space between letters but without underlining. Footnotes should appear at the bottom of the relevant page separated by a line from the main text. Pages should be numbered in the right upper corner. References to the literature in the text should be numbers enclosed in square brackets and should be listed in alphabetical order at the end of the paper.

The bibliography should be cited as follows:

Books: initials and names of all authors (typed with a space between letters), title, place and year of publication.

Articles: initials and names of all authors (typed with a space between letters), full title, the journal as abbreviated in *Mathematical Reviews*, volume number (in arabic), year in parantheses,, first and last page numbers.

The paper should conclude with indication of the author's place of employment and his address.
