

DATABASE
**ENHANCED ELECTRONIC
GRAMMARS (EEG) ONLINE**

Content

***Enhanced Electronic Grammars Online (EEG)* features high-quality, comprehensive descriptions of individual languages from geographical regions and language families all across the world, especially Africa, Asia-Pacific, and South America.**

- De Gruyter's **first-ever** cross-linguistic grammar database, and the **first of its kind to ever hit the market!**
- Makes available **full grammars** in an interlinked and semantically-annotated format, enabling granular access and cross-linguistic queries
- Highlights numerous language descriptions, including De Gruyter Mouton's renowned grammar series

Content

- Easy and flexible content searches **specifically tailored** to the language researcher
- Allows for **cross-language comparison of grammatical phenomena**, as well as research of individual language descriptions
- Content enhanced through multimedia components such as **audio, video, and maps**
- **Biannual updates** include the integration of several new, full grammar publications

Search Help

Welcome to the free trial version of the *Enhanced Electronic Grammars* database. This pre-launch version – available until 31 December 2014 – features a representative spread of 5 full language grammars (Hup, Jamsay, Lao, Madurese, Mapuche), both with respect to language family and geographic location.

We are currently working to fine-tune the database prior to its official launch in January 2015. Your comments and feedback on the trial version are welcome at Mouton.Editorial@degruyter.com.

Enhanced Electronic Grammars (EEG) features comprehensive descriptions of languages from around the world. This unique online resource makes full grammars available together in an interlinked and semantically-annotated format, allowing granular access to the grammatical data and enabling cross-language research of several grammars at the same time. In addition to cross-linguistic queries, each grammar can also be read and researched individually. The electronic format allows for multimodal enhancement of language descriptions, such as audio and video supplements. The database is updated biannually, integrating several new grammar publications each year for even more extensive cross-linguistic research.

EEG features:

- High-quality comprehensive grammars of individual languages from various geographical regions and language families

Results list

22 entries

The screenshot shows a search results interface. At the top, it says "You are looking at 1-10 of 75 entries" with a blue circle around the number "10". Below this is a search filter "Full Text: Adjective" and a "Clear All" button. On the left, there are two sections: "Fewer search options..." with a dropdown menu set to "Full Text" and a text input containing "Adjective", and "Browse" with expandable categories for "Language Family" and "Region". A "Search Help" link is also present. The main results area shows a list of items. At the top of this area, there are controls for "Items per page" (set to 10) and "Sort by" (set to Language). A "Page: 1 2 3 4 5 6 7 8" indicator is on the right. Each result entry includes a "Hup" logo, a title, author information, a "Chapter" label, a "SAVE" button, and a "LICENSED ACCESS" icon. Callouts point to the "10" in the items per page dropdown, the "Language" dropdown, the "Hup" logo, and the "1-10 of 75 entries" text.

A Grammar of Hup
Mouton Grammar Library
Volume 43
Author(s): Patience Epps
Mouton de Gruyter (Berlin, New York) 2008

Chapter 6 The noun phrase: modification and definiteness
Patience Epps

Language:	Hup
Language Family:	Nadahup; Eastern Nadahup; Hup-Yuhup; Hup
Macro Area:	South America

This chapter deals with issues relating to the noun phrase and its behavior within the clause, with a particular focus on modification and definiteness. While Chapter 5 dealt with the compound noun, a noun phrase composed of two (or more) associated members of the open class of nouns, this chapter examines the closed classes of nominal modifiers – demonstratives, quantifiers, and adjectives – and their roles within the noun phrase. It also addresses the ability of members of these closed word classes to act as nominal heads in their own right, occurring in lieu of a noun or noun phrase as the argument of a verb. A few additional non-nominal functions (adverbial, determiner, etc.) of these closed word classes (specifically interrogative pronouns and demonstratives) are briefly considered here as well. In the final section of this chapter, I also briefly discuss noun phrase coordination. Issues relating to case marking have been dealt with in §4.3; locative postpositions, which typically combine with a noun to form an adverbial phrase within the clause, are discussed in §10.3.

A basic phrase structure template for the noun phrase (in which the noun stem N may be either compound or simple) is provided here. The order of the constituents is fairly rigid within the noun phrase itself; when numerals, demonstratives, or possessors follow the noun, they are probably best interpreted as appositional noun phrases in their own right, or even as predicate nominals.

Advanced Search Options

The image displays two screenshots of a search interface. The left screenshot shows a dropdown menu for selecting search criteria, with 'Full Text' selected. A yellow callout box points to this menu with the text: 'You can choose from a number of different search criteria'. The right screenshot shows a search form with two rows of criteria, both set to 'Full Text'. A blue circle highlights the logical operator dropdown menu, which has 'And' selected. A yellow callout box points to this menu with the text: 'For more than one search criteria, you can choose from three possible combination options'. The interface includes 'CLEAR' and 'SEARCH' buttons at the bottom of each form.

Advanced Search: Example using „Full Text“ and „Macro Area“ search criteria

The screenshot shows an advanced search interface with the following elements:

- Search Results Summary:** "You are looking at 1-10 of 28 entries" (circled in blue). Below it are filters: "Full Text: Adjective", "Full Text: Reduplication", "Macro Area: South America", and "Clear All".
- Search Options Panel (Left):** Titled "Fewer search options...". It contains:
 - Search criteria dropdowns: "Full Text", "Adjective", "Reduplication", "Macro Area", "South America".
 - Logic dropdowns: "And", "Not".
 - Buttons: "CLEAR", "SEARCH", "[+] Add row".
- Search Results (Right):** A list of results for "Jamsay".
 - Item 1: "4 Nominal, pronominal, and adjectival morphology" by Heath, Jeffrey. Includes a "SAVE" button and a "LICENSED ACCESS" icon.
 - Item 2: "6 Noun phrase structure" by Heath, Jeffrey. Includes a "SAVE" button and a "LICENSED ACCESS" icon.
 - Item 3: "3 Phonology" by Heath, Jeffrey. Includes a "SAVE" button and a "LICENSED ACCESS" icon.
- Annotations:** Two yellow callout boxes with arrows pointing to specific UI elements:
 - One points to the "1-10 of 28 entries" text, with the text "Number of entries found".
 - Another points to the "Add row" link, with the text "Select to add additional criteria".
- Additional UI Elements:** "Items per page" (set to 10) and "Sort by" (set to Language) are located at the top right. "Page: 1 2 3" is at the bottom right.

Search Help *Enhanced Electronic Grammars*

Quick Search

The search box for quick search is displayed on top of the left-hand side. Enter a search term and click the magnifying glass to launch your search. The search will be performed in the Full Text field.

Advanced Search

Select **More search options...** from the menu bar to open the advanced search form.

Three entry fields are available, each of them is preset with a search criterion. You can select a different search criterion from the list available for each entry field. Select the desired search category/ies from the drop-down menus and enter your search term(s) in the adjacent search box(es). Once you start typing a word, a word list or an auto-complete list will open. These lists contain all terms available in the selected field. You can click on a term to copy it to the search form, or type your search. Search terms within the same search box are automatically combined with a Boolean AND. Between search boxes you can use AND, OR or NOT.
