

# DE GRUYTER OPEN INSTITUTIONAL MEMBERSHIP

As part of De Gruyter, we publish more than 400 scholarly journals across many disciplines in the Open Access Model. Most of these belong to universities, research institutes and societies. As a result of the recent developments in Open Access (OA) publishing and the rapid expansion of De Gruyter Open's portfolio, we have introduced our Institutional Membership offer. Its key principles are:

- ▶ 15% discount on all Open Access publications or 20% discount under consortia offers
- ▶ No charges from any membership, annual or additional fees
- ▶ Post-Payment offer with invoicing once a year (special terms negotiable, e.g. pre-payment or more frequent invoicing)

## WITH THE DE GRUYTER OPEN INSTITUTIONAL MEMBERSHIP, ANY MEMBER INSTITUTION CAN:

- ▶ **Plan:** Estimate its budget for the publications authored by affiliated authors and published by De Gruyter Open in a given year
- ▶ **Save time:** Receive the simplest administration of budget spending, including verification of the author's affiliation by De Gruyter Open
- ▶ **Save costs:** Profit from discounts offered not only on 'pure' Open Access articles and books, but also on hybrid Open Access options under the De Gruyter Open Library program (where articles in hybrid journals and contributions (book chapters) in edited volumes can be made available via Open Access, also retrospectively, according to the fees table that applies to 'pure' OA publications)
- ▶ **Pay later:** Cover the discounted costs for publications by affiliated authors published by De Gruyter Open only at the end of a given calendar year, and when an inventory of these publications has been prepared and approved
- ▶ **Enjoy great benefits:** Receive top OA publishing services, distribution and increased visibility for all published articles

## AFFILIATED AUTHORS WHO PUBLISH WITH DE GRUYTER OPEN BENEFIT FROM:

- ▶ Simple and easy handling of publication fees
- ▶ Use of top quality publishing technology and powerful promotion
- ▶ Full coverage of articles and books by abstracting & indexing services, distribution of content to users globally through aggregators and discovery services
- ▶ More citation opportunities as a result of greater visibility

## PUBLISHING FEES

### Article Processing Charges (APCs)

- ▶ €1,500 - molecular biology, medicine, biomedicine
- ▶ €1,000 - rest of biology (plant sciences, zoology), science, engineering, economics, business, law
- ▶ €500 - rest of social sciences, humanities

### Book Processing Charges

- ▶ €10,000 - Book Processing Charge irrespective of its subject area
- ▶ €1,500 - Book Chapter Processing Charge irrespective of its subject area

If you are interested in learning more about our Open Access Institutional Membership program and how it can work for your organization, please visit <http://degruyteropen.com/you/librarian/institutional-membership> and contact us (E-Mail: [Katarzyna.Kozinska@degruyteropen.com](mailto:Katarzyna.Kozinska@degruyteropen.com)). We would be pleased to meet with you personally and to start discussions regarding the possibilities of Open Access publishing for your organization as an Institutional Member of De Gruyter Open.

De Gruyter Open ([www.degruyteropen.com](http://www.degruyteropen.com)) is one of the world's leading publishers of open access scientific content. Today De Gruyter Open publishes about 400 own and third-party scholarly journals across all major disciplines. The company was established in 2001 and is now part of the De Gruyter publishing group ([www.degruyter.com](http://www.degruyter.com)). Since 2006 De Gruyter Open has been a member of Association of Learned and Professional Society Publishers (ALPSP) and International Association of Scientific, Technical & Medical Publishers (STM). De Gruyter Open's book and journal programs have been endorsed by the international research community and some of the world's top scientists – Nobel Prize Winners included. The company is on the constant mission to make best scientific content freely available to all scholars and readers alike.
