Objective
The B.E. Journal of Theoretical Economics (BEJTE) welcomes submissions in all areas of economic theory, both applied and pure theory, as well as submissions on economic experiments that feature substantial theory components. The journal especially welcomes novel approaches and interdisciplinary work on economic theory. The editors of the BEJTE understand that novel and interdisciplinary approaches may be difficult to evaluate, that their relationship to standard approaches may not be entirely clear yet, and that not all potential applications of such novel and interdisciplinary have been fully developed yet. Pure theory papers to be published in the BEJTE include, but are by no means limited to, those in behavioral economics, decision theory, game theory, general equilibrium theory, information economics, mechanism design, matching theory, networks, and entirely new fields yet to be created. Applications could encompass, but are not restricted to, contract theory, financial economics, industrial organization, internet economics, labor economics, law and economics, personnel economics, public finance, and novel applications yet to be developed.

Topics
- behavioral economics
- decision theory
- game theory
- general equilibrium theory
- information economics
- mechanism design
- contract theory
- matching theory
- social networks

SUBSCRIPTION RATES FOR 2018

Article formats
BEJTE recently switched from the previous four-tier system (Frontiers, Advances, Contributions, and Topics) to a two-tier system. Besides "Research Articles" we publish now also "Notes", which typically are more concise manuscripts.

> Information on submission process

Your benefits:

- Leading venue for top-notch economic theory
- Interdisciplinary approaches
- Pure and applied theory
- Top innovative content
- High quality peer-review
- Internationally renowned Editorial Board
