BIOMOLECULAR CONCEPTS

Ed. by Pierre Jollès, Isabelle Mansuy

Objective

BioMolecular Concepts (BMC) is a peer-reviewed journal fostering the integration of different fields of biomolecular research. The journal aims to provide expert summaries from prominent researchers, and conclusive extensions of research data leading to new and original, testable hypotheses. Aspects of research that can promote related fields, and lead to novel insight into biological mechanisms or potential medical applications are of special interest. Original research articles reporting new data of broad significance are also welcome.

Topics

- cellular and molecular biology
- biochemistry
- genetics
- epigenetics
- neurosciences
- developmental biology
- structural biology
- molecular medicine.

Article formats

- review articles, short conceptual overviews, original research articles

> Information on submission process

Your benefits:

- Interdisciplinary research
- Conceptual overviews and reviews
- Expert summaries from prominent researchers
- High quality peer-review
- Online ahead-of-print publication
