BIOMEDICAL ENGINEERING / BIOMEDIZINISCHE TECHNIK

Joint Journal of the German Society for Biomedical Engineering in VDE and the Austrian and Swiss Societies for Biomedical Engineering and the German Society of Biomaterials

Ed. by Olaf Dössel

Objective

Biomedical Engineering / Biomedizinische Technik (BMT) is a high-quality forum for the exchange of knowledge in the fields of biomedical engineering, medical information technology and biotechnology/bioengineering. As an established journal with a tradition of more than 60 years, BMT addresses engineers, natural scientists, and clinicians working in research, industry, or clinical practice. All articles are peer-reviewed. All manuscripts must be submitted in English.

Topics

- diagnostic imaging
- image processing
- biosignal processing
- modelling and simulation
- biomechanics information and communication in medicine
- telemedicine and e-health surgery
- minimum invasive interventions
- endoscopy and image guided therapy diagnostic and therapeutic instrumentation
- clinical engineering, micro- and nanosystems in medicine
- active implants
- biosensors neuro-engineering
- neural systems
- rehabilitation and prosthetics biomaterials
- cellular and tissue engineering
- artificial organs biomedical engineering for audiology
- ophthalmology
- emergency and dental medicine
- general subjects (e.g., education and training, health technology assessment)
- special topics (e.g., linking proteomics and genomics with biomedical

6 Issues per year
Print ISSN: 0013-5585
Online ISSN: 1862-278X

Language of Publication: English

Subjects:
- Biomedical Engineering
- Clinical Medicine
- Clinical Medicine, other

Of interest to:
- researchers and decision-makers in the field of bioengineering,
- managers in development laboratories and in the entire sector of medical research,
- chief consultants in clinics, sanatoriums and hospitals, self-employed businesspeople
- and traders in the area of biomedical engineering, professionals in health insurance, libraries
