Cellular & Molecular Biology Letters is an international journal dedicated to the dissemination of fundamental knowledge in all areas of cellular and molecular biology, certain aspects of biochemistry, biophysics and biotechnology. Regular papers and short communications that contain new and significant information of general interest to workers in these fields are welcome. Sufficient details must be included to enable others to repeat the work. The journal also invites timely reviews and mini reviews. Particularly welcome are papers dealing with:

- Cell cycle and its regulation
- Cell differentiation
- Cell traffic and signalling
- Stem cells
- Gene expression regulation
- Cellular membranes
- Cytoskeleton
- Molecular biotechnology
- Cancer cell biology

**Why subscribe and read**

- Excellent articles authored by researchers from all over the world, who appreciate our fast, fair and constructive peer review

**Why submit**

- Fast, fair, and constructive peer review and editing

Print ISSN: 1425-8153
