Objective

*Green Processing and Synthesis* is a bimonthly, peer-reviewed journal that provides up-to-date research both on fundamental as well as applied aspects of innovative green process development and chemical synthesis, giving an appropriate share to industrial views. The contributions are cutting edge, high-impact, authoritative, and provide both pros and cons of potential technologies. *Green Processing and Synthesis* provides a platform for scientists and engineers, especially chemists and chemical engineers, but is also open for interdisciplinary research from other areas such as physics, materials science, or catalysis.

Topics

- Flow chemistry, microreaction technology and microfluidics
- Process intensification
- Green chemistry
- Nanosciences for chemical engineering
- Chemicals from biomass: biofuels and intermediates

Article formats

Original articles, reviews

Information on submission process

Your benefits

- State-of-the-art knowledge in the broad field of green process development and chemical synthesis
- Strong interdisciplinary approach
- Renowned international editorial board
- Publication online and print incl. online first mode

SUBSCRIPTION RATES FOR 2018

**Online:**

Institutional

€ [D] 474.00 / US$ 714.00 / GBP 389.00*

Subscription

€ [D] 99.00 / US$ 149.00 / GBP 80.00*

**Print:**

Institutional

€ [D] 474.00 / US$ 714.00 / GBP 389.00*

Subscription

€ [D] 474.00 / US$ 714.00 / GBP 389.00*

**Print + Online:**

Institutional

€ [D] 570.00 / US$ 854.00 / GBP 467.00*

Subscription

€ [D] 570.00 / US$ 854.00 / GBP 467.00*

**Single Issue (Print):**

€ [D] 87.00 / US$ 131.00 / GBP 71.00*

6 Issues per year

Print ISSN: 2191-9542
Online ISSN: 2191-9550

Language of Publication: English

Subjects:

Catalysis
Chemical Engineering
Green and Sustainable Technology
Organic Chemistry

Of interest to:

Chemists; chemical and environmental engineers; physicists; materials scientists

IMPACT FACTOR 2017: 0.736
5-year IMPACT FACTOR: 1.170

Editor-in-Chief
Volker Hessel (School of Chemical Engineering, The University of Adelaide, Australia)

Editors
Galip Akay (formerly School of Chemical Engineering and Advanced Materials, Newcastle University, UK)
Isabel Arends (Biocatalysis and Organic Chemistry, Department of Biotechnology, Delft University of Technology, The Netherlands)
Michael C. Cann (Environmental Science at Chemistry Department, University of Scranton, USA)
Yi Cheng (Beijing Key Laboratory of Green Reaction Engineering and Technology, Tsinghua University, China)
Giancarlo Cravotto (Organic Chemistry, University of Torino, Italy)
Heidrun Gruber-Wößfler (Institute of Process and Particle Engineering, Graz University of Technology, Austria)
Dana Kralisch (Institute for Technical Chemistry and Environmental Chemistry, Friedrich Schiller University Jena, Germany)
Krishna D.P. Nigam (Department of Chemical Engineering, Institute of Technology Delhi, India)
Basu Saha (Chemical and Petroleum Engineering, School of Engineering, London South Bank University, UK)
Christophe A. Serra (European Engineering School of Chemistry, Polymers and Materials Science, University of Strasbourg, France)
Whei Zhang (Boston Center for Green Chemistry, University of Massachusetts Boston, USA)

Assistant Managing Editor
Jannelies Smit (Department of Chemical Engineering and Chemistry, Eindhoven University of Technology, The Netherlands)
