Objective
The *International Journal of Nursing Education Scholarship* (IJNES) publishes significant research and scholarship in the broad field of nursing education. The mandate of the journal is to present high quality papers to advance nursing education through research, description of innovative methods, or introduction of novel approaches about all aspects of nursing education in a timely manner. The specific aims of IJNES are to: promote worldwide scholarship in nursing education, enhance and advance nursing education globally, and provide a forum for the dissemination of international perspectives and scholarship in nursing education.

Topics
- Student, faculty, curriculum, and program development and evaluation
- Theoretically-based teaching and learning strategies in classroom, clinical, and flexible learning contexts
- Issues and trends in nursing education
- Administration and leadership of nursing education programs

Article formats
Research, expository, and short exemplar articles, as well as critical literature reviews about diploma, degree, post-graduate and continuing education are invited from colleagues around the world.

Information on submission process

Your benefits
- Most recent research and scholarship on nursing education
- International perspective on nursing education and the scholarship of nursing education
- Outstanding platform for communication about nursing education research and practice
