Since 1960, the International Union of Pure and Applied Chemistry (IUPAC) has made a large amount of important chemical information available to chemists everywhere through the journal *Pure and Applied Chemistry*.

*Pure and Applied Chemistry* is the official monthly Journal of IUPAC, with responsibility for publishing works arising from international scientific events and projects that are sponsored and undertaken by the Union. The policy is to publish highly topical and credible works at the forefront of all aspects of pure and applied chemistry, with the attendant goal to promote widespread acceptance of the Journal as an authoritative and indispensable holding in academic and institutional libraries.

The objectives of the Journal are:

- to publish papers based upon authoritative lectures presented at IUPAC sponsored conferences, symposia and workshops.
- to publish papers or collections of papers by invitation, as special topic features.
- to publish IUPAC Recommendations on nomenclature, symbols and units.
- to publish IUPAC Technical Reports on standardization, recommended procedures, collaborative studies, data compilations, etc.

IUPAC and De Gruyter

In addition to the work presented in Pure and Applied Chemistry, De Gruyter is proud to partner with IUPAC in the publication of the society's quarterly newsmagazine, *Chemistry International* and the new Open Access journal *Chemistry Teacher International*, as well as the *IUPAC Standards Database*.
