Objective

*ZNC* is an international scientific journal and a community resource for the emerging field of natural and natural-like products.

The journal publishes original research on the isolation (including structure elucidation), bio-chemical synthesis and bioactivities of natural products, their biochemistry, pharmacology, biotechnology, and their biological activity and innovative developed computational methods for predicting the structure and/or function of natural products.

*A Journal of Biosciences: Zeitschrift für Naturforschung C* welcomes research papers in fields on the chemistry-biology boundary which address scientific ideas and approaches to generate and understand natural compounds on a molecular level and/or use them to stimulate and manipulate biological processes.

Topics

- Bio-chemical synthesis and bioactivities of natural products
- Isolation (including structure elucidation)
- Biochemistry
- Biotechnology
- Pharmacology
- Chemistry
- Biology

Article formats

Original research articles, research notes, letters and review articles
