The journal disseminates research in both observational and theoretical astronomy, astrophysics, solar physics, cosmology, galactic and extragalactic astronomy, high energy particles physics, planetary science, space science and astronomy-related astrobiology, presenting as well the surveys dedicated to astronomical history and education.

Why publish in Open Astronomy?

► Open Astronomy is the first, fully open access journal covering all fields of astronomy and astrophysics.
► All articles are available to read, download and share for free
► The journal provides language editing for authors from non-English speaking regions.

Other benefits for an author in Open Astronomy:

► transparent, comprehensive and fast peer review (a brief description of publication process),
► the journal uses continuous publication model - accepted manuscripts are published quickly after the acceptance,
► tracking available during the entire publication process - from submission to the publishing of manuscript via Editorial Manager System,
► no space constraints, high-resolution images embedded in texts,
► authors retain copyright of articles published in Open Astronomy, there is no embargo period on self-archiving,
► visibility and discoverability: promotion of single articles to scientific and general press
► immediate publication after acceptance.

Open Astronomy does not have submission charges. In 2018 Open Astronomy implements Article Publication Charges (APCs). In the first year with fees, we offer 50% discount to all authors. Fee amount after discount is 500 Euro per publication.

Online:
Open Access
1 Issue per year
Online ISSN: 2543-6376
Language of Publication: English
Subjects:
Astronomy and Astrophysics

IMPACT FACTOR 2016 (Baltic Astronomy): 0.439
5-year IMPACT FACTOR (Baltic Astronomy): 0.591

CiteScore 2017: 0.16
SCImago Journal Rank (SJR) 2017: 0.131
Source Normalized Impact per Paper (SNIP) 2017: 0.109
Special Issues

**Special Issue on Modern Achievements in the Theory of Comets, the Dynamics of Small Bodies of the Solar System's Asteroid-Comet Hazard**

(04-08 September 2017, Zavolzhsk, Russia and 02-06 October 2017 Agoy, Russia)

Guest Editors:
- Professor Mikhail Sachkov, Institute of Astronomy, Russian Academy of Sciences, Moscow, Russia
- Dr. Anna Kartashova, Institute of Astronomy, Russian Academy of Sciences, Moscow, Russia
- Professor Vyacheslav Emel'yanenko, Institute of Astronomy, Russian Academy of Sciences, Moscow, Russia
- Dr. Lidiya Rykhlova, Institute of Astronomy, Russian Academy of Sciences, Moscow, Russia
- Dr. Polina Levkina, Institute of Astronomy, Russian Academy of Sciences, Moscow, Russia

**Upcoming Topical Issues**

- **Archaeoastronomy and Ethnoastronomy Research**
  Coordinating Editors: Ragbir Bhathal, Philip A. Clarke, Irakli Simonia

**Special Issue on Modern Analytical Methods Applied to Earth, Planetary, and Material Sciences II**

Guest Editor: Professor Arnold Gucsik, Hungarian Academy of Science, Hungary

Open Astronomy is a peer-reviewed, fully open access online journal, that publishes research, reviews and news spanning all aspects of astronomy and astrophysics.

Open Astronomy (formerly Baltic Astronomy) was founded by the Institute of Theoretical Physics and Astronomy (Lithuania) in 1992 and acquired by De Gruyter in 2016.
Editor-in-Chief
Philip Judge, High Altitude Observatory, National Center for Atmospheric Research, US

Managing Editor
Ewa Chmielewska, De Gruyter

Editorial Advisory Board
Suresh Chandra, Amity Institute of Applied Sciences, Amity University, India
Christopher J. Corbally, Vatican Observatory Research Group, Steward Observatory, Tucson, Arizona, USA
Martin Hendry, University of Glasgow, School of Physics and Astronomy, UK
Eugene Kennedy, Dublin City University, School of Physical Sciences, Ireland
Maciej R. Konacki, Nicolaus Copernicus Astronomical Center of Polish Academy of Science, Poland
Ignacio Negueruela, University of Alicante, Physics, System Engineering & Signal Theory, Spain
Alexei A. Pevtsov, National Solar Observatory/Sacramento Peak, and New Mexico State University, USA
Maria Sofia Randich, Arcetri Observatory, Italy
Vytautas P. Stražys, Institute of Theoretical Physics and Astronomy, Vilnius University, Vilnius, Lithuania
David Valls-Gabaud, French National Center for Scientific Research (CNRS), and the Paris Observatory, France
José Manuel Vaquero, Department of Physics, University of Extremadura, Spain
Joris Paul Wim Verbjes, Bielefeld University, Faculty of Physics, Germany
Ivan Valtchanov, European Space Astronomy Centre, European Space Agency, Madrid, Spain
Vladas Vansevičius, Astronomical Observatory, Vilnius University, Vilnius, Lithuania
Bojan Vršnak, University of Zagreb, Hvar Observatory, Faculty of Geodesy, Croatia

Editors
Luis Acedo, Institute for Multidisciplinary Mathematics, UPV, Valencia, Spain
Roberto Oscar Aquilano, Institute of Physics Rosario, National University of Rosario, Argentina
Frédéric Arenou, Paris Observatory and French National Center for Scientific Research (CNRS), France
Nasser Barghouty, NASA’s Marshall Space Flight Center, Huntsville, Alabama, USA
Drahomir Chochol, Astronomical Institute of the Slovak Academy of Sciences, Slovakia
Matt Darnley, Astrophysics Research Institute, Liverpool John Moores University, UK
Alessandro Ederoclite, Centre of Studies of Physics of the Cosmos of Aragón (CEFCA), Spain
Hans Joachim Haubold, United Nations, Office for Outer Space Affairs, Austria
Yu Jiang, State Key Laboratory of Astronautic Dynamics, Tsinghua University, China
