Why subscribe and read

For readers the journal will position itself as the central and most authoritative publication in structural mechanics, engineering structures, architectural design, wind engineering, aerospace engineering, naval engineering, structural stability, structural dynamics, structural stability/reliability, experimental modeling and smart structures. The content of the journal is especially dedicated to scientists carrying out research and/or interested in structural mechanics, engineering structures, architectural design, wind engineering, aerospace engineering, naval engineering, structural stability, structural dynamics, structural stability/reliability, experimental modeling and smart structures.

Why submit

The goal of the journal is to be the first and the main publishing option for authors writing on engineering and architectural science, and a hub integrating the relevant research community. The journal serves research papers from a broad range of topics both theoretical and applied ones.

Authors of Curved and Layered Structures enjoy the following benefits:

- fast, comprehensive and transparent peer-review
- free language assistance for authors from non-English speaking regions
- immediate publication upon completing the publishing process
- Secure archiving by De Gruyter and the independent archiving service Portico
- extensive promotion and worldwide distribution of each published article
- unrestricted access for all readers.

Curved and Layered Structures becomes a partner of:

4th International Conference on Mechanics of Composites, Madrid, 9 - 12 July 2018
The aim of Curved and Layered Structures is to become a premier source of knowledge and a worldwide-recognized platform of research and knowledge exchange for scientists of different disciplinary origins and backgrounds (e.g., civil, mechanical, marine, aerospace engineers and architects). The journal publishes research papers from a broad range of topics and approaches including structural mechanics, computational mechanics, engineering structures, architectural design, wind engineering, aerospace engineering, naval engineering, structural stability, structural dynamics, structural stability/reliability, experimental modeling and smart structures. Therefore, the Journal accepts both theoretical and applied contributions in all subfields of structural mechanics as long as they contribute in a broad sense to the core theme.

**Journal Editor**
Francesco Tornabene, University of Bologna, Italy

**Associate Editors**
Lorenzo Dozio, Polytechnic of Milan, Italy
Elena Ferretti, University of Bologna, Italy
Aurora Angela Pisano, Mediterranea University of Reggio Calabria, Italy
Alfred G. Striz, Oklahoma University, USA

**Editorial Advisory Board**
Serge Abrate, Southern Illinois University, USA
Sarp Adali, University of Kwazulu-Natal, South Africa
Maria Antonietta Aiello, University of Salento, Italy (antonietta.aiello@unisalento.it)
Luigi Ascione, University of Salerno, Italy
J. Ranjan Banerjee, City University London, UK
Romesh C. Batra, Virginia Polytechnic Institute and State University, USA
Zdenek P. Bazant, Northwestern University, USA
Salvatore Brischetto, Polytechnic University of Turin, Italy
Alberto Carpinteri, Polytechnic University of Turin, Italy
Jeng-Tzong Chen, National Taiwan Ocean University, Taiwan
Zhengtao Chen, University of Alberta, Canada
Omer Civelek, Akdeniz University, Turkey
Moshe Eisenberger, Technion, Israel
Luciano Feo, University of Salerno, Italy
Fernando Fraternali, University of Salerno, Italy
Seyed M. Hashemi, Ryerson University, Canada
Alexander L. Kalamkarov, Dalhousie University, Canada
Gennady M. Kulikov, Tambov State Technical University, Russia
Giuseppe Lacidogna, Politecnico di Torino, Italy (giuseppe.lacidogna@polito.it)
Kim Meow Liew, City University of Hong Kong, China
Parviz Malekzadeh, Persian Gulf University, Iran
Federico M. Mazzolani, University of Naples "Federico II", Italy
Claudio Mazzotti, University of Bologna, Italy
