Demonstratio Mathematica publishes original and significant research on topics related to functional analysis and approximation theory. Please note that submissions related to other areas of mathematical research will no longer be accepted by the journal.

The potential topics include (but are not limited to):

- Approximation theory and iteration methods
- Fixed point theory and methods of computing fixed points
- Functional, ordinary and partial differential equations
- Nonsmooth analysis, variational analysis and convex analysis
- Optimization theory, variational inequalities and complementarity problems

For more detailed list of the potential topics please refer to Instruction for Authors.

The journal considers submissions of different types of articles. "Research Articles" are focused on fundamental theoretical aspects, as well as on significant applications in science, engineering etc. "Rapid Communications" are intended to present information of exceptional novelty and exciting results of significant interest to the readers. “Review articles” and “Commentaries”, which present the existing literature on the specific topic from new perspectives, are welcome as well.

Why read
Demonstratio Mathematica is a premier source of a high quality research. Thanks to Open Access all articles (starting from the year 1969) are freely available to the academic community worldwide.

Why submit
Authors benefit from:

- Open Access
- 1 Issue per year
- Online ISSN: 2391-4661
- Language of Publication: English
- Subjects: Analysis, Differential Equations and Dynamical Systems, General Mathematics
- Of interest to: Scientists, graduate students, and experts in mathematics.
- CiteScore 2017: 0.28
- SCImago Journal Rank (SJR) 2017: 0.231
- Source Normalized Impact per Paper (SNIP) 2017: 0.443
- Mathematical Citation Quotient (MCQ) 2017: 0.12
- ICV 2017: 121.78

degruyter.com
fair and constructive peer-review

- no space constraints
- language-correction services
- immediate publication of accepted papers*
- Open Access for all articles**
- promotion of published papers to readers and citers
- long-time preservation of the content***

* The journal uses continuous publication model - accepted manuscripts are published quickly after the acceptance.
** Thanks to Open Access, all articles are freely available to the academic community worldwide without any restrictions, there are more liberal policies on copyrights (authors retain copyright) and on self-archiving (no embargo periods).
*** The journal is archived in Portico.

In 2018 Demonstratio Mathematica offers 50% discount to all the authors - the publication fee amounts to 500 Euro per paper, regardless of its length. Additionally, fees for authors who have limited access to funding for publications may be further reduced or in some cases completely waived. For more details please refer to Article Processing Charges.

Detailed information on Editorial Policy, Publication Ethics, Instructions for Authors etc. can be found below and in the Supplementary Information section.

Topical/Special Issues:

- **Topical Issue on Ulam Stability**

  **Editorial Board:**
  Ioan Rașa, Technical University of Cluj-Napoca, Romania
  Janusz Brzdęk, AGH University of Science and Technology, Poland
  Dorian Popa, Technical University of Cluj-Napoca, Romania
  Bing Xu, Sichuan University, China

  **Editorial Advisory Board:**
  Themistocles M. Rassias, National Technical University of Athens, Greece

  Flyer

deguyter.com
Special Issue on Harmonic Analysis: Smooth and Non-Smooth

Editorial Board:
John Herr, Butler University, USA
Justin Peters, Iowa State University, USA
Eric Weber, Iowa State University, USA

Editorial Advisory Board:
Palle Jorgensen, University of Iowa, USA

Special Issue on Analytic Functions and Related Topics

Guest Editors:
Stanisława Kanas, University of Rzeszów, Poland
Piotr Drygaś, University of Rzeszów, Poland
Beata Fałda, State School of Higher Education in Chełm, Poland
Svetlana Mincheva-Kaminska, University of Rzeszów, Poland
Stawomir Sorek, University of Rzeszów, Poland
Edyta Trybucka, University of Rzeszów, Poland

Special Issue based on 7th International Eurasian Conference on Mathematical Sciences and Applications (IECMSA-2018)

Guest Editors:
Murat Tosun, Sakarya University, Turkey
Emrah Evren Kara, Düzce University, Turkey
Soley Ersoy, Sakarya University, Turkey
Fuat Usta, Düzce University, Turkey
Demonstratio Mathematica is a fully peer-reviewed, open access, electronic-only journal devoted, since 2017, to functional analysis, approximation theory and related topics. The journal presents a forum where all aspects of these problems can be discussed. The journal provides the readers with free, instant, and permanent access to all content worldwide; and the authors with extensive promotion of published articles, long-term preservation, language-correction services, no space constraints and immediate publication.

Demonstratio Mathematica is listed inter alia by Clarivate Analytics (ESCI) and SCOPUS. Our standard policy requires each paper to be reviewed by at least two Referees and the peer-review process is single-blind.

The journal has been published since 1969, from the year 1972 in English and other languages (since 1995 exclusively in English). Until the end of the year 2016 it was published by the Faculty of Mathematics and Information Science of Warsaw University of Technology, as The Journal of Warsaw Technical University.

Editor-in-Chief
Calogero Vetro, University of Palermo, Italy

Managing Editor
Justyna Zuk, De Gruyter

Editorial Advisory Board
Ravi P. Agarwal, Texas A&M University - Kingsville, USA
George Anastassiou, University of Memphis, USA
Marlene Frigon, University of Montréal, Canada
Doron Lubinsky, Georgia Institute of Technology, USA
Gradimir V. Milovanovic, Serbian Academy of Sciences and Arts, Serbia
Dumitru Motreanu, University of Perpignan, France
Donal O'Regan, National University of Ireland, Galway, Ireland
Tohru Ozawa, Waseda University, Japan
Tao Qian, University of Macau, China
Themistocles M. Rassias, National Technical University of Athens, Greece
Simeon Reich, Technion - Israel Institute of Technology, Israel
Billy E. Rhoades, Indiana University, USA
Hari Mohan Srivastava, University of Victoria, Canada
Wataru Takahashi, Tokyo Institute of Technology, Japan
