The aim of the Journal of Geodetic Science is to become a premier source of knowledge and a worldwide-recognized platform of exchange for scientists of different disciplinary origins and backgrounds (e.g., Surveyors, Geodesists and Geophysicists). The journal publishes geodetic research from a broad range of topics and approaches including Geodetic Networks, Deformation analysis, Adjustment theory and application of mathematical statistics, Satellite Geodesy, Physical Geodesy, Geodynamics, Geometric Geodesy, (see the scope listed below for more). However, we will accept both theoretical and empirical contributions in all subfields of Geodesy as long as they contribute in a broad sense to the core theme.

The scope includes, but is not restricted to:

- Surveying Engineering
- Geodetic Networks
- Deformation Analysis
- Adjustment Theory and Mathematical Geodesy
- Global Navigation Satellite Systems (GNSS)
- Inertial Geodesy
- Geoid determination and height systems
- Marine Geodesy and Satellite Altimetry
- Satellite Gravimetry
- Geometric Geodesy
- Numerical methods and software developments in Geodesy
- Geodynamics
- Geophysical Geodesy

CALL FOR PAPERS:

- Special Issue GGHS2018 - International Symposium - Gravity, Geoid and Height Systems 2 “GRAVITY FIELD OF THE EARTH”; 17-21
September 2018 Copenhagen, Denmark

Journal of Geodetic Science is a peer-reviewed, electronic-only journal that publishes original, high-quality research on topics broadly related to Geodesy. The journal focuses on theoretical and application papers.

Editor-in-Chief
Mehdi Eshagh, University West, Sweden

Managing Editor
Jan Barabach, Jan.Barabach@degruyteropen.com

Editorial Advisory Board
Zuheir Altamimi, Institut National de l'Information Géographique et Forestiere (IGN), France
Georges G. Balmino, French Space Agency (CNES), France
Riccardo Barzaghi, Politecnico di Milano, Italy
Carla Braitenberg, University of Trieste, Italy
Anny Cazenave, French Space Agency (CNES), France
Toni M. van Dam, University of Luxembourg, Luxembourg
Athanasios Dermanis, The Aristotle University of Thessaloniki, Greece
William Featherstone, Curtin University of Technology, Australia
Willi Freed, Technical University of Kaiserslautern, Germany
Erik Grafarend, Stuttgart University, Germany
Erwin Groten, Darmstadt University, Germany
Manuel Hernández-Pajares, Universitat Politecnica de Catalunya, Spain
Johani Kakkuri, Finnish Geodetic Institute, Finland
William Kearsley, University of New South Wales, Australia
Matt King, University of Tasmania, Australia
Karl R. Koch, University of Bonn, Germany
Richard Langley, University of New Brunswick, Canada
Zdeněk Martinec, Dublin Institute for advance sciences, Ireland
Helmut Moritz, Technical University of Graz, Austria
Nikolaos Pavlis, National Geospatial-intelligence Agency, USA
Richard Rapp, Ohio State University, USA
Michael Schmidt, German Geodetic Research Institute (DGFI), Germany
Michael G. Sideris, University of Calgary, Canada
