Sample Preparation is closed for submissions since August, 2018.

Sample Preparation is a peer-reviewed, open-access journal that publishes original research and review articles dealing with all aspects of fundamental and applied sample preparation including solid-phase, liquid-phase and membrane-based techniques. The journal covers all developments in sample preparation including theory, new instrumentation and devices, introduction of novel sample preparation techniques, application of existing techniques to new areas, improvement of existing techniques to solve particular analytical problems, development and evaluation of novel materials useful for sample preparation and detailed comparisons of sample preparation methods.
