Why subscribe and read

Business Systems Research (BSR) is a scientific journal focusing on research findings in economics and business systems. Additionally, BSR considers research that combines business and economics with other fields of scientific enquiry, e.g. information systems, mathematics and social sciences. BSR examines a wide variety of business decisions, processes and activities within the actual business setting, as well as within the systems approach framework.

Why submit

Business Systems Research is a good opportunity for publication of research that describes and explores economics and business systems. Our policy is to give feedback to authors as fast as possible. After receiving the paper that is prepared to Author instructions, editorial board will inform the author on appropriateness of the paper to the journal within two weeks. First review will be delivered as fast as possible, but not later than two months. Reviews that we provide are thorough and give author clear directions on how to improve the paper.

Similarity Check Plagiarism Screening System

The editorial board is participating in a growing community of Similarity Check System's users in order to ensure that the content published is original and trustworthy. Similarity Check is a medium that allows for comprehensive manuscripts screening, aimed to eliminate plagiarism and provide a high standard and quality peer-review process.

Detailed description of the Similarity Check System can be found at:
https://www.crossref.org/services/similarity-check/
Business Systems Research (BSR) is a scientific journal focusing on research findings in economics and business systems. Additionally, BSR considers research that combines business and economics with other fields of scientific enquiry, e.g. information systems, mathematics and social sciences. BSR examines a wide variety of business decisions, processes and activities within the actual business setting, as well as within the systems approach framework. Theoretical and empirical advances in perceiving businesses as systems are evaluated on a regular basis.

In this respect, the BSR journal fosters the exchange of ideas, experience and knowledge between regions with different technological and cultural traditions, in particular in transition countries. Papers submitted for publication should be original theoretical and practical papers. The journal also publishes case studies describing innovative applications and critical reviews of theory.

The journal is indexed in Scopus and Clarivate Analytics - Emerging Sources Citation Index & Web of Science.

Editor-in-Chief
Mirjana Pejić Bach, University of Zagreb, Faculty of Economics & Business, Department of Informatics, Croatia

Associate Editors
Ksenija Dumičić, University of Zagreb, Faculty of Economics & Business, Department of Statistics, Croatia
