**Rejection Rate**
- 45%

**Similarity Check Plagiarism Screening System**

The editorial board is participating in a growing community of Similarity Check System's users in order to ensure that the content published is original and trustworthy. Similarity Check is a medium that allows for comprehensive manuscripts screening, aimed to eliminate plagiarism and provide a high standard and quality peer-review process.

Detailed description of the Similarity Check System can be found at: [https://www.crossref.org/services/similarity-check/](https://www.crossref.org/services/similarity-check/)

Acta Chirurgica Latviensis is a broad-based journal appearing twice per year, publishing original articles, problem – solving articles, case reports in various branches of surgery and in fields associated with surgery. Since 2005 journal is published only in English (in all previous journals articles had abstracts in English). The number of copies per year is 1000. Journal is sent to 13 international libraries. Acta Chirurgica Latviensis is a possibility to publish the...
results of investigations for experts in their field and young specialists as well. Latvia Academy of Science has included Acta Chirurgica Latviensis as scientific journal under international review.
