Why subscribe and read

► promotion of the world scientific achievements, including Polish accomplishments, on the international forum
► high standard of contents and good publishing quality available in both forms, electronic and printed

Why submit

► fast peer review and publication, language-correction services for authors from non-English speaking regions
► possible publication of more general and long articles about certain aspects of theory and technology, physical experiments and their application
► prompt promotion of each article in numerous abstracting databases

“International Journal of Occupational Medicine and Environmental Health” (IJOMEH) is an English-language bimonthly (since 2013, earlier – a quarterly) founded in 1988 at the initiative of the Nofer Institute of Occupational Medicine in Łódź and the Main Board of the Polish Society of Occupational Medicine. IJOMEH popularizes the achievements of Polish scientific centers of occupational medicine and environmental health at the international forum.

The journal has a distinguished Editorial Team and an international Editorial Board of outstanding experts in the field of a wide-grasp occupational and environmental health, ensuring that the journal maintains high academic standards and has a broad international coverage. The submitted articles are subjected to a rigorous peer-review prepared by reviewers chosen from among scientific authorities (in 2013 – http://www.editorialsystem.com/ijomeh/journal/about/#reviewers)

“International Journal of Occupational Medicine and Environmental Health” is assigned for presenting the contemporary research in occupational and environmental health from all over the world, particularly those which could be
later used in practice for preventive activities.

The journal publishes original papers, communications, review and discussion papers, case reports and letters to the Editor. Special preference is given to papers concerning industrial hygiene, toxicology, preventive medicine, diagnosis and treatment of occupational diseases, physiology and psychology of work, physical, biological and chemical hazards, carcinogenesis, environmental toxicology, environmental epidemiology and epidemiological studies devoted to occupational problems. The subject of the published works reflects the changing role of occupational medicine and environmental health in Poland and in the world.

**Editor-in-Chief**
Konrad Rydzyński, Nofer Institute of Occupational Medicine, Łódź

**Associate Editors**
Alicja Bortkiewicz, Nofer Institute of Occupational Medicine, Łódź, Poland

Marta Kieć-Świerczyńska, Nofer Institute of Occupational Medicine, Łódź, Poland

Dorota Merecz, Nofer Institute of Occupational Medicine, Łódź, Poland

Beata Pępolńska, Nofer Institute of Occupational Medicine, Łódź, Poland

Irena Szadkowska-Starciecy, Nofer Institute of Occupational Medicine, Łódź, Poland

Wiesław Sułkowski, Nofer Institute of Occupational Medicine, Łódź, Poland

Mariana Śliwińska-Kowalska, Nofer Institute of Occupational Medicine, Łódź, Poland

Jolanta Walusiak-Skorupa, Nofer Institute of Occupational Medicine, Łódź, Poland

Wojciech Wąsowicz, Nofer Institute of Occupational Medicine, Łódź, Poland

**Statistical Editor**
Wojciech Sobala, Nofer Institute of Occupational Medicine, Łódź, Poland

**Language Editors**
Magdalena Machcińska-Szczechaniak, Nofer Institute of Occupational Medicine, Łódź, Poland

Stefan Markiewicz, Nofer Institute of Occupational Medicine, Łódź, Poland

Joanna Wierzbowska, Nofer Institute of Occupational Medicine, Łódź, Poland

**Technical Editor**
Katarzyna Rogowska, Nofer Institute of Occupational Medicine, Łódź

**Secretary of IJOMEH**
Tomasz Kuc, Nofer Institute of Occupational Medicine, Łódź, Poland
