Why subscribe and read

microRNA Diagnostics and Therapeutics (miRNA Dx/Rx) serves as a central portal to integrate the most up-to-date and relevant data on microRNA diagnostic and therapeutic studies. Since methodological, experimental and intellectual challenges and solutions for microRNA-based diagnostic and therapeutic applications are likely to present both commonalities across disciplines and also peculiarities in specific diseases, miRNA Dx/Rx provides a convenient and authoritative platform to gain quick access to this multidisciplinary knowledge.

Why submit

microRNA Diagnostics and Therapeutics (miRNA Dx/Rx) offers fast, constructive and comprehensive peer-review for a professional and satisfactory experience for submitting authors. miRNA Dx/Rx provides a visible platform for authors’ studies to reach a broad audience of academic and industrial scientists, pathologists, clinicians, and other health care providers carrying out research on and/or interested in the development, implementation and application of microRNA-based diagnostic and therapeutic tools for management and treatment of human disease.

miRNA Dx/Rx’s relevance and visibility relies on the quality of the accepted publications and on the active engagement of its Editorial Advisory Board (EAB) with the scientific community. Internationally-recognized scholars and investigators, who are leaders in key areas of the microRNA field, constitute the EAB of miRNA Dx/Rx.
