

Announcement

14th European Congress of Perinatal Medicine

Location: Marina Congress Center, Helsinki

Date: June 5–8, 1994

The program includes plenary sessions (preeclampsia, perinatal infections, congenital malformations), debates on controversies in perinatal medicine (eg. antenatal steroids, clinical use of doppler flow measurements, vaginal breech delivery, intravenous immunoglobulin for preterm infants), symposia on current topics, free paper and poster sessions. An attractive social program will be offered as well as pre- and post-congress tours in Finland and Scandinavia, the Baltic republics, and Russia.
