(Received July 3, 1992)

Source of material: Reaction of N-(2-hydroxyphenyl)-salicylaldimine with pyridine in *n* – propanol solution and a methanolic solution of Cu(OAc)₂ · H₂O. Hydrogen H(1) for C(1) and C(1A) determined by difference fourier. The other hydrogen atoms were geometrically positioned at a C-H distance of 0.98 Å.
