Bauwelt

Bauwelt is the leading German architectural journal, addressing an audience of professionals. It was founded in 1910 and is based in Berlin. It is a forum for analyses and comments on the latest trends in architecture and urban planning and is issued every two weeks. *Bauwelt* is a medium of opinion and tendency; it generates relevance for readers from the discussion and classification of the latest architectural, urban planning and building policy issues: what opportunities and challenges does the current housing situation present? What does the energy revolution mean for architects and planners? How does demographic change impact on urban development? What role do investors and project developers play today? Possible answers to these important issues of building today and in the future are elaborated in an interdisciplinary manner and discussed in *Bauwelt* with assessments coming from different perspectives.
