Preface	vii
<b>1 Dirichlet forms</b>	<b>1</b>
1.1 Semi-Dirichlet forms and resolvents	1
1.2 Closability and regular Dirichlet forms	9
1.3 Transience and recurrence of Dirichlet forms	12
1.4 An auxiliary bilinear form	20
1.5 Examples	30
1.5.1 Diffusion case	30
1.5.2 Jump type case	36
<b>2 Some analytic properties of Dirichlet forms</b>	<b>43</b>
2.1 Capacity	43
2.2 Quasi-Continuity	51
2.3 Potential of measures	55
2.4 An orthogonal decomposition of the Dirichlet forms	60
<b>3 Markov processes</b>	<b>72</b>
3.1 Hunt processes	72
3.2 Excessive functions and negligible sets	76
3.3 Hunt processes associated with a regular Dirichlet form	80
3.4 Negligible sets for Hunt processes	89
3.5 Decompositions of Dirichlet forms	94
<b>4 Additive functionals and smooth measures</b>	<b>112</b>
4.1 Positive continuous additive functionals	112
4.2 Dual PCAFs and duality relations	128
4.3 Time changes and killings	138
<b>5 Martingale AFs and AFs of zero energy</b>	<b>149</b>
5.1 Fukushima's decomposition of AFs	149
5.1.1 AFs generated by functions of $\mathcal{F}$	151

---

5.1.2	Martingale additive functionals of finite energy . . . . .	152
5.1.3	CAFs of zero energy . . . . .	154
5.2	Beurling–Deny type decomposition . . . . .	169
5.3	CAFs of locally zero energy in the weak sense . . . . .	179
5.4	Martingale AFs of strongly local Dirichlet forms . . . . .	190
5.5	Transformations by multiplicative functionals . . . . .	203
5.6	Conservativeness and recurrence of Dirichlet forms . . . . .	208
<b>6</b>	<b>Time dependent Dirichlet forms</b> . . . . .	<b>215</b>
6.1	Time dependent Dirichlet forms and associated resolvents . . . . .	215
6.2	A parabolic potential theory . . . . .	224
6.3	Associated space-time processes . . . . .	239
6.4	Additive functionals and associated measures . . . . .	248
6.5	Some stochastic calculus . . . . .	259
