Contents

Introduction .......................................................... 1

I Meaning and Reference

The Puzzle That Never Was—Referential Mechanics .......... 21
Joseph Almog

Reference and Meaning .............................................. 35
William P. Alston

Still Against Direct Reference ................................. 61
Michael Devitt

On Meaning, Meaning and Meaning ............................. 85
Ruth Garrett Millikan

On Referents and Reference Fixing ............................. 107
Howard Wettstein

II Truth-theoretic Semantics

On Some Examples of Chomsky’s ................................. 121
Graeme Forbes

Truth, Meaning and Contextualism ............................. 143
Samuel Guttenplan

Expression, Truth, Predication, and Context: Two Perspectives .. 171
James Higginbotham
Prospects for a Truth-conditional Account of Standard Meaning ........................................... 195
Guy Longworth

A Very Large Fly in the Ointment: Davidsonian Truth Theory Contextualized ......................... 223
R. M. Sainsbury

From Truth Conditions to Structured Propositions ............................................................. 259
Richard Schantz

Five Flies in the Ointment: Some Challenges for Traditional Semantic Theory .......................... 287
Gabriel M. A. Segal

III Meaning Skepticism

Against Meaning-Skepticism ................................................................. 311
Paul Horwich

Phenomenal Intentionality and Content Determinacy ...................................................... 321
Terry Horgan and George Graham

Semantic Realism and the Argument from Motivational Internalism ........................................ 345
Alexander Miller

IV The Metaphysics and Epistemology of Meaning and Content

Meaning and Content in Cognitive Science ......................................................... 365
Robert Cummins and Martin Roth

Knowledge of Meaning and Epistemic Interdependence ........................................... 383
Jennifer Hornsby
